5th
Edition

OUR DNA

check last page for more info about us.

www.solarscreen.eu

Well, here you go, it's ready:
The fifth edition of SOTT's Tool catalog!

Once again, we've put a lot of work in to create an even better catalog for you. Over 100 new tools have been added, each with a clear explanation of how, when and why to use it. Isn't it good to know that I have held each item in my hands to judge whether it is worthy to be included in the SOTT catalogue? I can genuinely say that this fifth edition is better than ever!

We have updated the categories and added new ones. Also, we've also created a special selection of "tools for interior decoration films". But in case of any remaining questions about a product... You've come to know us: we are always ready to help!

And so this is the perfect moment for the next happy announcement: SOTT has partnered with Solar Screen to improve service, logistics and development. Starting today, SOTT Tools and Liquids are part of Solar Screen, who with their incredible service, experience and outstanding logistic power will be able to speedily serve any customer anywhere in Europe. We believe that this partnership will bring even more benefits to all SOTT customers. Our commitment to you remains unchanged as you will now experience it through the Solar Screens delivery program.

For those who just got a scare and think that SOTT must have folded: not so fast! I myself will continue to be personally involved in developing SOTT tools with Solar Screen. In parallel, I will also expand the delivery program. But also, SOTT Automotive will continue to focus on design and automotive films, such as our carwrap films and the Elemento Carbon. More than 34 years of knowledge, experience and creativity will now be focused on those areas – it's going to be awesome!

I wish every distributor, film installer, car wrapper, signmaker and designer an excellent experience with our specialist tools. We can't wait to make them available to you.

Yours sincerely,
Marco Boyer

Marco Boyer has been active in the world of adhesive films since 1988. His career in this field started as head creative designer, after which he started working independently in the window tinting, car wrapping, sign making, interior film and ppf installing business. In 1995 SOTT's roots started growing into the international enterprise it is today. Marco has written 15 course books containing innovative film installing techniques that are now widely in use.

SOTT

SOTT® Vinyl Cutter

- quick and easy cutting without damaging the substrate
- fast cutting of film from a roll while it's still in the printer or cutting plotter.
- fast cutting of film to size when it's already on the car.

This handy little knife is a 'must have' for every fast fitter. Not only that, this knife can do much more as it was originally intended for the opening and cutting of envelopes, paper, cardboard boxes, etc.

You know the problem: the film is on the car - get your knife - blade out - cut the film - and then pray you haven't cut in to the paintwork... There's a much easier and less stressful way. Just take your Easy Cutter and cut your films to size in one go, without fear of cutting in to the paintwork.

The secret is in the shape and construction of the Easy Cutter. It has a plastic head with a flat underside and an angled stainless steel blade mounted on the inside of the head. The film runs between the top and underside of the head, so the blade can't possibly come in contact with the substrate.

It's also 100% safe as the blade is concealed in the head. So having to slide the blade back in before putting the knife in your pocket or tool bag is a thing of the past.

The Easy Cutter is manufactured from durable plastic with rubber inlays that prevent slipping.

In short: a simple tool for quickly cutting film without a lot of hassle.

There is a 'sight' at the front that allows the cutting line to be followed accurately. Handy and clever.

This ergonomic hand grip with soft rubber inlay ensures a perfect grip allowing effortless cutting of both straight and more intricate cuts.

Built in blade.

- Cutting Security films
- Cutting Banner materials
- Cutting PVC films
- Cutting window films
- Easy to use at your printer
- Easy to use at your plotter

Attention:
the blade cannot be replaced

MARTOR® SECUMAX COMBI safety knife

- cut without touching the surface

This handy safety knife from Martor is perfect for cutting interior films and thick PVC films without cutting into the substrate. The strong plastic body lies particularly well in your palm allowing you to apply sufficient pulling force.

The substrate is smooth and rounded so it cannot damage anything. The knife sits securely in the body and cannot injure or damage anything. Also, the double-sided blade is easy to replace or flip over in the body.

Recommended knife blades: 120-025R

OLFA

OLFA® Top Sheet Cutter

- incredible as it may seem, the TS-1 cuts only the top layer !

This OLFA® cutter is your top choice when you want to cut only the top sheet. Its unique design lets you cut the top layer while preserving those below. While the cutter is great for cutting coupons and printed articles, you also can use it on cardstock, thin films, plastic sheeting, tape and more. Good For: cutting a single sheet of paper, newspaper and thin vinyl.

NT Cutter
EVER NEW & EVER SHARP

NT® Cutter Designer knife

- perfection in cutting with 'the perfect touch'

This knife enables perfect curves and openings to be cut in the film without damaging the car paintwork or substrate as it allows more "feel" during cutting as the correct cutting pressure is easier to determine. Fits perfectly in the hand. The blades can not only be placed in the head in the straight, traditional way, but also in the 'designers-way'.

Place the blade in the rear of the head to create an extremely sharp cutting angle for perfect uniform cuts. This art knife is manufactured from extremely durable plastic with a stainless steel head.

Recommended knife blades: 120-KB-25, 120-SAB10, 120-BD100

OLFA

OLFA® 28mm Perforation Cutter

- 28 mm serrated blade
- easy blade change

Perforation cutter from OLFA with a 28mm serrated blade. Due to the larger (28mm) diameter of the deeper serrated steel blade, perforations can be cut very easily. Suitable for making folds in cardboard, tear-off strips and serrated edges in paper and foil. The perforation blade is optionally replaceable by a regular 28 mm rotary cutter.

Made of high-quality Japanese tungsten tool steel and designed for unmatched sharpness and superior edge retention. All OLFA knives undergo an advanced manufacturing process where the micro-honed blade provides superior initial sharpness and edge retention, resulting in excellent sharpness and longevity.

Suitable for cutting a range of materials like:
Fabrics, Textiles, Cardboard, Paper, Leather

Spare blade: 120-RB28-2 and 120-RB28-10 (for straight cuts)

OLFA

OLFA® PRECISION SCISSOR - professional model

- precision Smooth Edge 5.2" (131mm)
- extra large handle for comfortable and precise cutting
- precision scissors for perfect cutting of small details

Experience the convenience and high quality of these OLFA scissors. The extra large handle fits up to 3 fingers in one loop for more strength and comfort when cutting. The symmetrical handles are also suitable for both left and right handed users. The straight edge blades glide easily through all types of film and are sharpened to the point for smaller or application cuts.

OLFA's unique special sharpening process helps the blades grip into stiff, rigid, thick or tough films and cut cleanly without the material folding over the blades - even when cutting left-handed!

The professional stainless steel rivet ensures that the blades are positioned very accurately and continue to move smoothly, even with heavy use.

OLFA® EXCEL BLACK™ -ultra sharp 12.5mm

- wallpaper cutting blades
- super thin: 0.25mm

This OLFA® EXCEL BLACK™ 12.5mm blade is the only blade in the world developed specifically for cutting wallpaper. It has been designed with a unique 65° angle, which was researched to be the ideal angle for cutting paper against a wall, and getting into corners. The ultra thin (0.25mm) blades will cut even the wettest, pasted wallpaper without dragging or tearing, and more importantly, leave near enough invisible joints. Splicing two layers of wallpaper is a pain with other blades, but these ones make it effortless, and leave results that impress. The blade has 13 snap segments.

- Sharpest possible blade for cutting wallpaper
- Ultra thin for near invisible joints
- Cuts through wet, pasted paper without dragging or tearing.

OLFA® Stainless Steel SCRAPER BLADES -for OLFA glass scrapers

- pack of 30 blades
- sharpened on both sides
- 120mm x 0,25mm
- also fits small scraper 300-GSR-2 (snap off system)

Stainless steel blade for the wide glass scraper 300-GSR-1 and the mini glass scraper 300-GSR-2. The special thing is that the knife consists of 3 segments that can be broken off from each other. So all of a sudden you have 3 blades for the mini scraper!

Specifically designed for the toughest scraping jobs without scratching the glass surface. Double ground cutting edge for superior sharpness and durability. Removes with ease: paint, vinyl, silicone, glue, dirt from ceramic or glass cooktops, films and films, stickers, paint residue, varnish, all types of sealants, mortar, excess adhesives and grout, etc.

SCRAPING & CLEANING

500-050

ROLL DISPENSER

- indispensable in every workshop

Metal dispenser for rolls of triple layer polishing paper (300-040). This handy dispenser holds a roll of polishing paper and allows individual sheets to be torn off across a black perforated guide at the top. The dispenser can be folded for easy transportation.

Suitable for:
Rolls of Triple layer polishing paper 300-040

500-050

price per piece

300-040

SOTT® POLISHING PAPER -triple layer

- 2 rolls -37cm (1'3") wide

Industrial grade triple layer highly absorbent polishing paper. This paper is extremely strong and will not disintegrate when saturated with water. Soft but strong. Indispensable in every workshop.

Useable for:
Roll dispenser 500-050

This high quality compactly rolled polishing paper is extremely soft and so will not scratch the substrate.

300-040

price per 2 rolls

300-023

Roll length: 36m (62 sheets)

LOWTACK TACK RAGS -on a roll

- removes all dust from any surface - leaves no residue

Slightly adhesive wipe on a roll. Ideal for removing all dust from any surfaces to be worked on. Removes dust from prints before laminating. Removes dust from windows and bodywork prior to film application. Removes dust from metal surfaces before painting or spraying. The roll is 30cm (1'2") wide and each roll consists of individual sheets that can be pulled off as required. One side is slightly adhesive. Leaves no residue.

LowTack tack rags on a roll are the perfect solution for removing dust from a variety of surfaces. Individual perforated sheets.

300-023

price per roll

300-022

TACK CLOTH DUST-FIX

- 10 pack

Slightly sticky cloth. Perfect for removing dirt and dust of window frames, cars or any area which has to be dust and dirt free before applying signs. Will not leave any residue behind. Creates an anti-static surface.

300-022

price per pack

ULTRACLEAN

The perfect cloth for CLEANING and INSPECTION purposes

For cleaning:

- Print head stations
- Printer components
- Electrical components
- Acrylate
- Rigid foam
- Vulnerable surfaces
- Bisonyl
- Painted and un-painted cars
- Glass windows and facades
- Door seals and frames
- Windscreens, including the dot matrix

ULTRACLEAN dust-free, micro fibre cloths - dirt absorbing

- **highly moisture absorbent, dust and lint free; won't tear**
- **ideal for cleaning joints and other nooks and crannies.**
- **indispensable for film fitters and car wrappers**

Ultra Clean white polishing cloths, often called surgical cloths, are manufactured from a micro fibre material and are completely lint and dust free. Not one single fibre is released during polishing. This enables the perfect cleaning of any surface. Extremely high moisture absorbency.

The all-round professional

Ultra Clean is so versatile it can truly be called an all-round professional.

It can be used for cleaning electrical components, printer heads on industrial printing equipment, cleaning and degreasing windows and windscreens before the application of film. Also ideal for cleaning acrylate and rigid foam sheets, as well as for cleaning cars and other vehicles before applying film.

Inspection cloth: Ideal!

These cloths are also highly suited for cleaning and degreasing hard to access areas such as in gaps and joints on cars and other vehicles.

The amount of stubborn dirt that these cloths can still remove from joints, edges and gaps is simply amazing.

Good application is dependent on good adhesion. That goes without saying. Unfortunately, the cleaning and degreasing of the most critical areas get overlooked. These include joints, sills and gaps in bodywork. This is exactly where the film tends to come loose and curl.

Experience has taught us that these are critical places that are often overlooked during cleaning. That's just not possible when Ultra Clean cloths are used. If necessary, just wrap a cloth around one of our special squeegees. Apply a little SOTT Surface Cleaner-II (600-SC02) or Industrial Degreaser (600-T800) to the cloth and get in to those nooks and crannies. The cloth will absorb the dirt which will be visible on the cloth itself. Only when the cloth stops absorbing dirt is the surface clean enough for the application of film.

Ultra Clean cloths are available in packs of 10 or 100.

Thorough cleaning of any joints or other awkward areas is essential for good film adhesion.

Simply take a squeegee and wrap a cloth around it. This will make the cleaning and degreasing of these hard-to-access areas a lot easier.

Ultra Clean cloths are ideal for checking to see if you have cleaned and degreased properly. These perfectly white cloths will soon show if any dirt is left in those awkward corners before you start application.

Tip:

Simply take a squeegee and wrap a cloth around it, this will allow you to clean and check all of those hard to access areas.

3M

SCOTCHBRITE® NON-SCRATCH SCRUB SPONGE

- grooved holder for perfect grip
- 15 x 7 x 4,5cm

Very special, non-scratch scrub sponge. Perfectly cleaning any surface you want. Will not scratch the surface when the sponge is wet. Ideal for cleaning shop windows, glass, plastics etc. And it removes adhesive residues too!

The grooved holder improves the grip on the sponge.

300-363 price per piece

300-026

3M

SCOTCHBRITE® SCRUB PAD -thin

- 22,5 x 15,5 x 1cm

Pro quality scourer Thin edition. Works very well for the removal of tough dirt and little bumps on car and home windows. The sponge is less than half an inch thick and fits nicely on the 300-035 SCRUBBER, so you can reach far corners and other hard-to-reach spots.

Also useable on the:

SCRUBBER scrub pad squeegee 300-035

CLEANING BLOCK 300-025

300-026 price per piece

300-027

3M

SCOTCHBRITE® SCRUB PAD -thick

- 25,5 x 12 x 2,5cm

Large scrub pad for glass cleaning. Easy to use because of its size. Useful for the thorough cleaning of the "dot matrix" on car windows.

Also useable on the:

SCRUBBER scrub pad squeegee 300-035

CLEANING BLOCK 300-025

300-027 price per piece

300-028

COPPER WIPES -for improved adhesion to the dot matrix

- soft and fine structure

Special copper wipes for cleaning the dot matrix, often seen around the edge of windscreens. It is often quite difficult to get film to adhere between the dots. These copper wipes will polish the raster slightly and this will improve adhesion. Copper wipes should only be used on the dot matrix.

CAUTION: **NOT** useable on tempered glass

300-028 price per set

300-044

CLEANING SPONGE for textured surfaces -absorbs dirt

- extracts dirt from the film pores
- perfect for matte car wrap films
- perfect for textured interior films

This special white sponge, in combination with our Car Wrap Cleaner 600-CC44 cleaning spray is the perfect solution for cleaning matte self adhesive films like car wrap film* (especially matt).

The sponge extracts all dirt released from imperfections in the film, returning it to its original colour. Rinse the film with water and job done! NB: these sponges should not be compared with other conventional sponges as they are more susceptible to wear and tear.

For best result, use:

CarwrapCleaner 600-CC44

*A detailed explanation of this process is included in Car Wrap Cleaner product 600-CC44.

300-044 price per set of 2

300-035

Size: 38cm x 8cm

THE SCRUBBER scouring pad squeegee

Before film is applied the glass should be clean, degreased, and any hard specks of dust or dirt should be removed. However, it's not always easy to get to every part of the window. Perhaps the window is just too big, or perhaps you can't get behind a radiator or a cabinet, etc.

It's now a piece of cake! Just attach a scouring pad (see 300-026) to the Velcro on the SCRUBBER and use where necessary. The SCRUBBER is made of sturdy plastic allowing a good deal of pressure to be applied during cleaning.

The SCRUBBER is equipped with a strip of Velcro allowing the simple attachment of a scouring pad.

Use on this squeegee:
Scrub pad 300-026

300-035 price per piece

300-025

CLEANING BLOCK for abrasive sponges

- 2 different hardness grades
- 7 x 4 x 12 cm

Hand block for abrasive sponges 300-026 and 300-027.

Using a hand block with a scouring pad prevents cramping and hand fatigue when cleaning large windows. In addition, the block also ensures equal distribution of pressure. The block has a hard and a soft side, so that it can fit to the shape of the glass. Both sides have a Velcro layer so that the scouring pad is directly attached to the block.

Use on this squeegee:
Scrub pad 300-026

or 300-027

300-025 price per piece

150-113

CLEANING Squeegee

- for proper cleaning of the edges of window frames.
- 10cm

Special squeegee for cleaning the edges of the glass at the window frame. The rubber is stiffer than ordinary squeegees and therefore the dirt can be pushed away better with the water.

150-113 price per piece

150-033

LIL' CHIZLER

Small and thin squeegee for small areas like the triangular windows, or for squeezing small air bubbles away. Also perfect to remove dirt and old adhesives from the rear window. Will not damage defrost liners on the rear window.

150-033

price per piece

150-034

THE CHIZLER -standard

Bigger than his little brother shown above. Will not damage defrost liners on the rear window.

150-034

300-GSR-2

OLFA

OLFA® 40mm Compact Glass Scraper

- robust and durable
- 6 spare blades in the body

The OLFA 300-GSR-2 is a durable, multi-purpose mini scraper suitable for tight, narrow spaces and curved surfaces. The handle is made of light, strong and reinforced fiberglass, with an enveloping non-slip grip that provides the user with a comfortable grip and better control over the blade. All metal parts are made of stainless steel. Suitable for gently removing burnt-in stains, suitable for use on windows. Locked blade avoids movement in the handle during heavy applications.

The blade container easily snaps into the handle when the tool is in use and serves as a blade safety cap if needed. Made of high-quality Japanese carbon steel and designed for unmatched sharpness and superior edge retention.

Works great for scraping:

300-GSR-1/3B
OLFA

OLFA® 120mm Glass Scraper

**- 12cm wide
- extra flat for better cleaning**

OLFA's special scraper makes it easy to remove paint, glue residue, stickers, glass paint and all kinds of dirt from glass surfaces. The thin design of the 300-GSR-1 allows it to go very low and flat over the glass. Ideal for use on wet surfaces, as the blade, mounting plate and screw are stainless steel. The blade is 0.25mm thick and ground on both sides.

By loosening the fixing screw and moving the metal plate, the worn blade can be easily removed. The cover of the blade can be slid onto the handle, giving you even more grip while scraping. Comes with 3 spare blades (120-GSB-1S).

Recommended razor blades:
120-GSB-1S (30 blades)

SCRAPERITE®

LIL' GRIPPER -scraper holder with polycarbonate scrapers

- polycarbonate scrapers will not scratch the substrate!
- for use on glass, car paints, composite sheet material, etc.

Removing adhesive residue and stubborn dirt can be quite a problem. Scouring, knives and metal scrapers can leave scratches.

This is where LIL' GRIPPER comes in! This small plastic holder uses a polycarbonate scraper in the shape of a razor blade, but it doesn't leave scratches. It can be used on car paints, Beauty Board, acrylate, rigid foam, wood, glass, etc.

A handy and indispensable scraper for every fitter that should be included in every tool bag, tool box and tool station. This will ensure that all cleaning and removal work will be effective and effortless. Scrapers can also be ordered separately.

The scraper in the LIL' GRIPPER has a sharp edge which will scrape off such things as adhesive residue with ease. TIP: scrape into one pile then remove with a polishing cloth. Repeat this procedure until all adhesive residue has been removed.

damage

The
WIDE Gripper

The big brother of the Scrapperite family. This 4" (10cm) wide scraper helps you tackle the toughest jobs by quickly removing adhesive residue, dirt, etc. from flat surfaces. The large polycarbonate scraper can be used on both sides and does not scratch surfaces. It's also easy to put in place and remove without fear of hurting yourself.

The Giant Gripper is entirely made of plastic, so it will never rust or oxidize. An indispensable tool for any signmaker, window tinter, painter or cleaner.

10cm (4") wide, so ideal for large surfaces. Feels comfortable in your hand and does not irritate even after a long time of use.

Special design features provide additional strength.

The curved shape provides the perfect scraping angle during removal.

Renewed, thought out and unmatched

ADHESIVE and DIRT removal without causing any damage

Scraperite is an american company that specializes in the removal of hand dirt, glue residue, hard obstacles, etc. from fragile and delicate surfaces.

The blades are made of a special plastic mix and come in different sizes and shapes, so that an optimal result can be achieved without damaging the surface.

Perfect for window film installers, car wrappers, interior film installers, advertising agencies, etc.

Scraperite ORANGE:

The Scraperite ORANGE is manufactured the softest material we offer and is a perfect tool for use on delicate surfaces. The orange version is made from Celcon and is approved by Boeing for use on Alclad aluminum airframes. Works great on painted and delicate surfaces.

Scraperite BLACK:

The SCRAPERITE BLACK is harder and intended for heavy-duty cleaning. This new, harder material is more resistant to breakage and wear. Designed for use in industrial applications where repeated use is normal. It also does a better job with more stubborn adhesives, sealants, oxidation, corrosion, etc. on less sensitive surfaces.

300-006

SCRAPERITE®

SOFT SURFACE SCRAPER MINI -with straight scrapers

- new type of holder for better grip
- 6 scrapers included

Removing adhesive residue and hard bits of dirt from surfaces can be a problem. Scouring pads, blades and metal scrapers can cause scratches. That is why Scraperite's orange scrapers are a godsend. This small plastic holder has an orange polycarbonate razorblade and does not scratch.

You can use it on car paint, acrylic, hard foam, wood, glass, etc.

A handy and indispensable scraper for every mechanic and should actually be available in every Tool Bag, Tool Box and Tool Station. In this way you can be sure that the cleaning, removal and scrubbing is done properly and without problems. Separate scrapers are also available.

The scraper has a sharp edge on both sides so that, for example, glue residue can be scraped up very easily.

TIP: scrape it to one heap and scoop it onto your cleaning cloth. Repeat this procedure until all glue residues are gone.

Fast Vinyl Removal

2 versions available:

Serrated

Smooth

Keep it simple and easy!

2 special eraser disks for fast and easy removal solutions.

No stress, no smelly environment, no waste of time.

with 4000 rpm!

Smooth

STRIP-IT™ Eraser Disk

Fast removal of film and stickers

Removing vinyl of a car can be a difficult and time consuming job. Especially when the vinyl is old and tears easily. Or what to think of removing reflective vinyl...

Use the Strip-IT Disk to remove stickers, adhesive films, decals, labels, stripings, etc. from cars, boats, trucks, motorcycles, glass window panes, etc. Also ideal for removing adhesive residue.

Safe

The STRIP-IT Disk is safe and does not scratch or damage quality car paints and acrylic and urethane paints, glass, metal, etc. Do not use on soft, delicate or fresh paints or coatings.

- Special formulated rubber
- Size: 90 x 15mm
- Recommended speed: 3000 - 4000 rpm
- Drill adapter included

300-010

price per piece

Serrated

STRIP-IT™ Eraser Disk T-series

Serrated for improved efficiency

For removing vinyl film, striping, stickers, decals, adhesive residue, double-sided tape or any other adhesive film. The special serrated edges keep the disk cool during use and enable easy handling.

Use the Strip-IT T-series to remove stickers, adhesive films, decals, labels, stripings, etc. from cars, boats, trucks, motorcycles, glass window panes, etc. Also ideal for removing adhesive residue.

Safe

The STRIP-IT T-Series is safe and does not scratch or damage quality car paints and acrylic and urethane paints, glass, metal, etc. Do not use on soft, delicate or fresh paints or coatings.

- Special formulated rubber
- Size: 102 x 25,4mm
- Recommended speed: 3000 - 4000 rpm
- Drill adapter included

300-010T

price per piece

Instructions for use:

Use the adapter for mounting it on a drill. Set drill to the right speed (rpm). Exert light pressure and move the disk back and forth whilst erasing. Any remaining adhesive residue or deposits can be polished away with SOTT 600-Z0415 Right-Off Adhesive Remover or 600-T800 Industrial Degreaser. Test on a small area before you start erasing large areas.

CUTTING TOOLS

Rule the World

A man with a beard, wearing a black leather jacket and pants, stands in a dark, industrial setting. He is holding a large, yellow, double-sided ruler vertically, which is the product being advertised. He is looking off to the side with a serious expression. The background is dark and textured, with some yellow and black hazard stripes at the bottom.

*Only
Brave Installers

THE ULTIMATE SAFETY RULER

The
cutting ruler
that **CAN'T SLIP**
during cutting

SOTT

THE YELLOW-5® CUTTING RULER

Anti-slip cutting ruler, indispensable for signmakers, window tint installers and interior film installers, that need to cut straight lines without the cutting ruler sliding all over the place.

A unique solid aluminium cutting ruler with all of the advantages that you could possibly wish for: strong, stable, straight, but above all safe. This allows you to make long cuts with ease, without the fear of the knife 'jumping' and running across your fingers. The workshop becomes safer and production is increased. Large sheets of film and thick, rigid materials can now be cut with ease.

The calibrations are clearly displayed in centimetres. This allows cuts to be made straight to size. The special anti-slip underside ensures perfect stability on every surface, be it glass,

The special raised edge saves your fingers from being cut.

The thick anti-slip layer not only prevents slipping, but also protects your work from damage.

Aluminium cutting ruler with raised edge to protect fingers

acrylate, card, linoleum, rubber or anything else for that matter; the ruler remains perfectly still during cutting. The ideal tool for large colour prints and the like. The anti-slip foam layer prevents the ruler from coming in to contact with your work preventing it from damage when the ruler is slid around. Very handy!

- ☒ **Cuts self adhesive films**
- ☒ **Cuts polyester window films**
- ☒ **Cuts plastic panels and foam boards**
- ☒ **Make super straight lines**

CUTTING & CONTOURTAPE -6mm

- define cutting lines before install ppf film
- create a flexible ruler for cutting purposes

This 6mm (.25") plastic tape is a revelation for every installer. Easy to stretch and shape, does not leave adhesive residue. Quite thick, so doesn't tear or break easily. Cutting and Contour Tape is ideal for:

Establish cutting lines:

If film needs to be cut to follow a desired form then Cutting and Contour Tape is the ideal solution. First apply the film, use the tape to create the desired form, and then simply cut carefully along the tape. The red and blue panel shown on the photo can be cut entirely freehand. The top of the full colour print that runs away slightly at the top can also be cut perfectly using the Cutting and Contour Tape.

PPF bulk installation with cutting tape

Use this tape to place the correct cutting lines. Then install the PPF film as you normally would. Now cut through the ppf film, and on top of the cutting tape. Pull the cutting tape from under the ppf film while spraying water under the film. Result: nice cut and the paint is not touched.

350-204

price per roll

3M Knifeless Tape™

No knife. No damage. No worries.

Removable Cutting tape that Easily CUT Film

Special removable tape with embedded cutting wire. Perfect tool to make clean cuts through digital print films, laminated films, car wraps, carbon- and other structured films when bonded to cars or other surfaces.
Not suitable for stone chip resistant PU films.

350-206

3M® Knifeless Tape **Finish Line**

Rotates easily in any direction with contours, curves and edges of the car. Accurately and efficiently cuts through self-adhesive film without the use of a knife and without surface damage, resulting in perfectly straight, smooth lines or curves.

- ☒ Cuts most vinyl wrap films.
- ☒ For applications with one or more vinyl layers

350-206

price per roll

350-207

3M® Knifeless Tape **Bridge Line**

This type of tape is wider and can therefore adhere to both sides of the body parts. This avoids the risk of cutting into the underlying rubbers, for example, or of the cut not being exactly in the middle.

- ☒ For cutting at doors and seams
- ☒ For cutting laminated perforated window films
- ☒ For applications with one or more vinyl layers

350-207

price per roll

350-208

3M® Knifeless Tape **Design Line**

Allows stretching, follows contours and turns easily in any direction. Excellent for creating designs & stripes with no extra steps required to achieve a perfect cut.

- ☒ Stretches slightly and turns easily in any direction.
- ☒ Best option for very tight curves.
- ☒ Tape can be torn by hand for faster application.
- ☒ For single layer vinyl applications.

350-208

price per roll

350-209

3M® Knifeless Tape **Perf Line**

Easily cut an even margin between window graphics and window rubber.

- ☒ Used for cutting laminated perforated window films (one-way vision) and creating a uniform relief cut along rubber molds before applying edge sealing tape.

350-209

price per roll

350-213

3M® Knifeless Tape **Precision Line**

Accurately and efficiently cut through self-adhesive film without using a knife or damaging the surface, resulting in perfectly straight, smooth lines or curves.

- ☒ Create a tight, invisible seam between two difficult to work with films.

350-213

price per roll

SECURIT CUTTING MAT

Makes
that perfect
cutting table

SECURIT™

CUTTING MAT -triple layer

- 3mm (120 mil) thick double layer calibrated cutting mat
- available in black, green and transparent

High quality cutting mat which closes after every cut, preventing your knife from following previous cuts. These mats are triple layer enabling both sides to be used. So they'll last twice as long!

The mat has a solid core which ensures that it remains flat on the table without curling.

The calibrations on the upper side allow the accurate positioning of the film or cutting ruler.

Handy tip: Use a number of smaller mats on a large table - e.g. 2'x 3' (60x90) instead of one large mat. Experience has taught us that some areas of a table are used more often than others, so the mats wear out quicker in some places than others. If you follow this advice you should only have to replace a single small mat instead of the whole table area. Simply attach the mat to the table with double sided tape. Never place warm or hot things (e.g. cups of coffee) on the cutting mat. This will cause permanent surface damage to the mat.

Cutting tracks are eliminated ensuring every cut is perfect. Even cutting in the finest detail is possible.

Transparent cutting mats are ideal for use on illuminated tables, because the light shines through the cutting mat.

Available in a variety of colours and sizes

250-CM series

OLFA

OLFA® CUTTING MAT multi-purpose self-healing craft

- one side shows cm, other side shows inches

CM series multi-purpose self-healing cutting mats are 2mm thick and especially designed for use with OLFA standard-duty cutters, heavy-duty cutters, art knives, rotary cutters and specialty cutters.

Double-sided with green base color and white grid lines with a metric grid on one side and an inch grid on the other. Grid lines are designed for easy measuring and for accurate cutting of straight lines and precise angles.

Self-healing, an OLFA original technology refers to the ability of the surface to return to its original shape after being cut and are ideal for general quilt cutting. A three-layer structure and soft cutting surface realize smooth cutting even after many years use. OLFA CM mats protect your work area and greatly extend the life of your blades.

Warning!

- Keep the mats away from sunlight and heat
- mats must be stored flat
- not suitable for use with steam irons
- not suitable for use with OLFA MC-45 and MC-45/DX

YOUR GROWTH,
OUR DRIVE

OUR DNA

SQUEEGES

150-CS10

10cm width

MP SQUEEGEE -multipurpose

- one corner is straight, the rest is rounded
- including alcantara strip with sponge

The MP Multipurpose squeegee has a number of advantages over standard squeegees:

1: It is made of soft plastic and is therefore flexible. In addition, the light texture provides less friction during the squeegeeing process, so the film can not be easily damaged.

2: The MP Squeegee has a right angle on one side. Ideal for pressing film into corners.

3: The alcantara strip with sponge ensures that super high gloss films such as chrome or black will not be scratched during the squeegeeing process (make sure you wet the blade before you start). The sponge keeps the alcantara wet.

4: On the side of the squeegee there are special openings where magnets can be placed, so the squeegee will stick to the body of the car when you want to put down the squeegee in order to have both hands free for a while.

WRAPEDGE TRIAL PACK - 4 different samples

A clean wrapping result is partly dependent on easy squeegeeing without scratching (!) The WrapEdge is made of alcantara and has a special moisture-absorbent sponge layer for wet work, for an even better result.

The Trial Pack contains one of each WrapEdge.

500-041

Price per set

PROTECTIVE FELT -wool

SOTT

PROTECTIVE -2mm

- self adhesive; will not come loose when wet**
- available in two widths**

Special high quality industrial grade wool felt. Does not become 'hairy' during use and is resistant to moisture and cleaning products so this felt will not come loose. The combination of wool felt with its thickness of 2mm allows an even pressure to be applied during application while the risk of scratching is eliminated. Available in two widths.

PROTECTIVE VELOURS

SOTT

PROTECTIVE VELOURS -1mm

- self adhesive; stays in place**
- specially intended for car wrap films and soft cast film applications**

Special 'felt' with an industrial grade adhesive layer that will not come loose. This 1mm (.04) thin protective felt is intended for use during car wrapping and allows extra pressure to be applied during application while the risk of scratching is eliminated. We recommend this version for use on glossy films. Available in two widths.

KEEPIN' IT SCRATCH-FREE AND SHINY

Wrapping pros all over the world use them: felt tips or sleeves that help your squeegee slide smoothly, called "buffers". But what is a good solution when installing high gloss films? And what about chrome and mirror films? Scratches do happen. SOTT has the solution: the WrapEdge, made of soft, structureless alcantara. Available in 4 types. These "buffers" do exactly what every installer and wrapper wants, because each type of WrapEdge has a preferred application.

HIGH GLOSS PVC FILM

Many installers have experienced that squeegeeing high gloss films (especially dark colours) causes scratches.

WrapEdge helps to avoid that! Because the middle layer absorbs and retains moisture, you can wet it with some soapy water and presto! the world's best squeegee is a fact. Your squeegee suddenly slides perfectly over the vinyl while the pressure is evenly distributed and the film is superbly applied with no issues whatsoever.

MIRROR FILMS?

Chrome film, polyester film or mirrored film - they all have one thing in common: they easily scratch when you install them. Wouldn't it be nice if you could simply squeegee them down and not have to worry about scratching?

VARIOUS THICKNESSES

The WrapEdge buffers have a sponge middle layer that serves

3 functions:

1: It holds moisture so it can contain the soapy water for wet squeegeeing. **2:** Wet installing of window film becomes a breeze, because the sponge layer absorbs the squeezed-out moisture at the edge. **3:** The thickness of this layer ensures an even pressure distribution when squeegeeing and flawlessly follows the channels and other recesses of the vehicle body parts when the film is pushed in.

WrapEdge

The WrapEdge buffers are available in 4 different types, each one for a specific application. Check the back for more information.

WrapEdge-00

Thin and strong alcantara. Spreads the squeegeeing pressure evenly. Can be moistened for an even better result. Contains no sponge layer.

The buffers are slightly larger than a standard squeegee, so the squeegee edges don't scratch.

Available on a roll 2cm x 2 mtr.

WrapEdge-01

Sturdy alcantara with a 1 mm sponge layer. Spreads the squeegeeing pressure ideally. Extremely suitable for chrome, high gloss, and polyester films.

The added 1mm sponge layer makes the squeegee's edge rounder and distributes the pressure over its full width. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

WrapEdge-02

Sturdy alcantara with a 2 mm sponge layer. Spreads the squeegeeing pressure ideally. Extremely suitable for chrome, high gloss, and polyester films.

The added 2mm sponge layer makes the squeegee edge thicker and rounder and distributes the pressure over its full width. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

WrapEdge-03

Sturdy alcantara with a 3 mm sponge layer. Perfect for wrapping in recesses and over swages as it can easily form the film in and over those areas.

The rounded edge of the squeegee is made thicker and is therefore very suitable for channels in company cars and vans. If necessary, wet the buffer to prevent scratches.

Available in sets of 12, pre-cut in 2 sheets.

PPF Squeegees for the professional PPF Installer

Paint Protection Film (PPF) is hot these days. But how do you properly install this very special and expensive film? Good tools are half the battle. With the following squeegees you have everything you need for a perfect installation and satisfied customer.

150-PP1

SOTT

SOTT® The Blue One Squeegee -soft

- soft and flexible

Small, very flexible rubber squeegee for the wet application of PU paintwork protection films on cars. This small squeegee follows every curvature of the car bodywork eliminating all application liquid simply and effectively.

150-PP1

price per piece

150-PP2

3M

3M® WetOrDry rubber Squeegee -ultra soft

- 7cm x 10,5cm

The squeegee is made of very soft rubber and follows literally any shape or contour of the surface. This squeegee is designed to wipe away the moisture under the PU film. Goes easily with any kind of bumper, bonnet or bumper strip.

Because of the softness of the touch, the squeegee pressure is lower and it does not damage the film. The nice touch ensures an even drying process of the moisture and the film.

150-PP2

price per piece

150-PP3

SOTT

The Pink Shaved Squeegee

- 10cm wide

The Pink Shaved squeegee is a must-have for every PPF installer!

This squeegee is ideal to install polyurethane films on bonnets, roofs, mudguards and doors. Because the squeegee is medium stiff, but has a thin soft edge, it follows the contours of the surface with the right pressure, thus removing the moisture under the film. The squeegee tapers gradually at the edge, making it flexible.

150-PP3

price per piece

150-PP4

SOTT

The Small Shaped One -soft but firm

- 5 cm x 8 cm

- trapezium shape

This medium hard squeegee is ideal for convex and concave surfaces. Think of bumpers, mirrors, spoilers, headlights, etc.

The trapezium shape allows you to use the squeegee on both sides.

The sharp edge is very soft, so it follows every shape without problems and pulls the moisture out from under the film very easily and nicely.

150-PP4

price per piece

150-PP5

SOTT

The Red Square -super soft

- 5,5 cm x 8,5 cm

- very soft and flexible

The Red Square is a block wrapper for very soft plastic, so that it follows all shapes very easily. Ideal for use on any type of surface. Whether it is a bonnet or a bumper, this squeegee follows everything and easily pushes all the moisture out from under the film. Due to its soft composition, The Red Square is ideal for use on films that are extremely smooth, high-gloss black or delicate; it will not damage the surface.

150-PP5

price per piece

150-075

SpeedWing Lime 11cm -Hard

- one side flat
- one side curved

The curved edge is designed to encourage a finger or bubble to disperse outward which reduces the chances of a crease.

SOFTLINE TURBO squeegees

150-003BT

12,5cm

SOFTLINE YELLOW TURBO -BIG TUBE squeegee -12,5cm

- better grip
- shaped corners
- harder than the Softline Turbo Squeegee

This Yellow Turbo BIG TUBE polyurethane squeegee is harder than the standard yellow versions and less flexible. The handle is bigger and gives you a better grip, allowing you to apply more force and pressure while squeegeeing. Specially designed for wet applications.

150-003BT price per piece

150-004GR

9cm

SOFTLINE GREEN TURBO squeegee -9cm

- ultra soft and flexible; perfect for ppf installations
- shaped corners

The smaller brother of the 150-003GR. This green polyurethane squeegee is soft and fits well in hand. Specially designed for wet mounts. Because of its enormous flexibility it is very suitable for touching up smooth films and films like PPF (paint protection films), cast films, window films etc. especially on round, curved and arched shapes.

150-004GR price per piece

150-003GR

SOFTLINE GREEN TURBO squeegee -12,5cm

- ultra soft and flexible; perfect for ppf installations
- shaped corners

This green polyurethane squeegee is soft and fits well in hand. Specially designed for wet mounts. Due to its enormous flexibility, it is ideally suited for touching up smooth films and films such as PPF (paint protection films), cast films, window films, etc. on especially round, curved and arched shapes.

150-003GR price per piece

SOFTLINE TURBO squeegees

A must-have squeegee made of PU. The PU edge is firm yet very soft when used during wet application. It follows every contour of the surface you're working on, squeezing out water from between the film and the surface.

Perfect for the first squeezes when positioning the film, followed by the more stronger BlueMax squeegee 150-007), Hybrid squeegees (150-048) or The Orange Crush squeegees (150-050). Different versions are available.

150-004

SOFTLINE YELLOW TURBO squeegee -9cm

- shaped corners

The YELLOW TURBO squeegee has a white plastic tube that provides good grip. The PU blade is firm yet very soft when used during wet application. It follows every contour of the surface you're working on. Perfect for the first squeezes when positioning the film. The corners are shaped. Width: 9cm

150-004

price per piece

150-003

SOFTLINE YELLOW TURBO squeegee -14cm

- shaped corners

The YELLOW TURBO squeegee has a white plastic tube that provides good grip. The PU blade is firm yet very soft when used during wet application. It follows every contour of the surface you're working on. Perfect for the first squeezes when positioning the film. The corners are shaped. Width: 14cm

SOTT

The HUSTLER: the ultimate 4 in 1 squeegee

- cleverly designed shape to reach everywhere
- a 4 in 1 squeegee

This cleverly shaped squeegee is a must for any installer. The different sides make it extremely practical to do various jobs with it. What can you do with this squeegee?

The Hustler

The 4 in 1 tool for every wrapper, interior film installer & window tinter

- 1 You can easily push wrap film under rubbers of window frames or around roof racks without damaging the film.
- 2 Also perfect for use as a cleaning tool. Wrap a cloth around the squeegee and use it to easily get into any small narrow place that area.
- 3 It can also be used as a cutting guide squeegee for window frames. After the window film is installed, place the squeegee on the film, at the top of the corner and against the rubbers of the window frame. Put your knife against the squeegee and slide both down in one movement. Result is a perfect straight cut.
- 4 Because the squeegee is smooth and solid, it is also good to use when installing rigid films such as interior films. You can use the rounded side of the Hustler to guide and turn the film in a sharp corner without damaging the film.

SOTT

The GREEN WING

- medium soft teflon, perfect for smooth squeegeeing
- special angles and shapes

The Green Wing is an indispensable squeegee for any professional installer. The squeegee is made of medium soft Teflon and is pliable so it can be used on both flat, convex and concave surfaces. Due to the four different edges and angles, it is possible to get any type of self-adhesive film pushed into the most difficult places. The edges are not sharp so the film will not be damaged.

For installing of:

- Window films (cars and buildings)
- Car wrapping
- Interior films

Automotive window film use:

This squeegee was actually developed to make it easier to push window film in cars behind the door strip and squeegee the moisture there. Thanks to the thin design and round shape, this is easy to do without damaging the window film.

Flat glass window film use:

Use the GREEN WING as a cutting guide squeegee for window frames. After the window film is installed, place the squeegee on the film, at the top of the corner and against the rubbers of the window frame. Put your knife against the squeegee and slide both down in one movement. Result is a perfect straight cut.

Prepping car for wrap

Use the GREEN WING as a cleaning squeegee. Put your cleaning cloth around the squeegee and you can clean and degrease any small corner, kink or edge.

SOTT

SOTT® APPLICATION GLOVE

- seamless - perfect fit - stretch

Seamless application glove, made of elastic material. The white material helps you to check whether the surface and/or the vinyl is clean. Because of the perfect fit it gives you the necessary feeling that you need during your application work, especially when you deal with curved surfaces on cars.

The glove is made of dust free material, so even touching the adhesive of the vinyl will not cause any residue to be left behind.

Perfect fit for applying you signs smoothly.

The clean and dust free fabric will help you to do professional and clean applications.

Completely seamless with a perfect fit.

Because of the perfect fit and thin material, you keep the necessary feeling in your fingertips.

Available

SOTT

THE FACTOTUM-II

- the solution for small corners, holes, seams and cracks - unbreakable material

Every mechanic knows it: mounting self-adhesive film in places that are hard to reach. The Factotum-II is a handy mini oval with two usable sides. It guides every film in the smallest corner or kink, without destroying the film while pressing. The smooth rounded corners give you the perfect opportunity to guide the film to where you want it. Medium stiff and unbreakable.

For installing window film:

Easily install your window film between window rubbers, door frames, or in a corner between the rear shelf by using the Factotum-II to direct the film to your desired location.

For installing interior film:

Mounting these films is a precise job. Every edge, seam and kink has to be perfect. Especially in corners and around small objects it is nice when you can finish and press the edges with precision tools. This is what the Factotum-II is for.

For installing wrapping film:

Installing wrapping film between headlights, window frames, door handles and taillights is precision work. Small tools are a godsend. The Factotum-II gives you the possibility to guide the film in the corner and press it on places you normally cannot reach.

150-027

TEFLON YELLOW Squeegee

Very soft and flexible Yellow Teflon squeegee. Perfect for use on large, curved windshields thanks to its 15cm width. Won't scratch glass.

150-027

price per piece

150-030

DIAMOND TIP Yellow

An essential tool for applying vinyl in hard to reach areas, because of the special design and sharp edges of this squeegee. Won't scratch glass.

150-030

price per piece

150-084

HAU TOOL BLACK SQUEEGEE -medium hard

Black plastic squeegee in parallelogram shape of German manufacture. This black version forms itself nicely to the shape of the surface while maintaining good pressure on the edge. Good to use as a squeegee for small narrow corners and slots but also for large surfaces. Does not scratch window films. The squeegee edges are 15 and 8 cm.

The light structure of the blade prevents it from slipping out of your hand when you work with moisture. The film does not stick to the squeegee either.

The red version 150-085 is a bit softer and more flexible.

150-084

price per piece

150-085

HAU TOOL RED SQUEEGEE -medium soft

Red plastic squeegee in parallelogram shape of German manufacture. This red version is a bit softer than the black version and therefore it follows the shape of curved surfaces just a little bit easier. It can be used as a squeegee for small, narrow corners and slits as well as for large surfaces. Does not scratch window films. The squeegee edges are 15 and 8 cm.

The light structure of the blade prevents it from slipping out of your hand when you work with moisture. The film does not stick to the squeegee either.

NOTE: The black version 150-084 is slightly stiffer.

150-085

price per piece

150-011

THE PLOW

Flexible squeegee for curved surfaces, such as windshields. Adapts itself to each surface.

150-011

price per piece

150-013

THE RED DEVIL

Very thin (1mm!) and flexible squeegee for positioning and applying windowfilm on side windows and for reaching sharply angled corners.

Stiff and smooth big squeegee to push back the rubbers in the door of cars. Makes tinting the windows of cars under the rubbers much easier.

400-003 price per piece

150-022

Tail Fin Green -soft

- designed for installation behind brake lights -soft and flexible
- softer than the yellow version

You know the problem: that third brake light at the bottom-center of the back window. This special tool is designed to make installing window film around the third brake light easier. It pushes out moisture -and keeps it out with pressure that holds down the edges behind that bothersome third brake light.

It has an arched, curved body that gets behind the brake light to apply the constant pressure required to keep moisture from seeping back, thus allowing the adhesive to grab. Designed with two holes in the body of the tool for a better grip.

150-022 price per piece

150-023

Tail Fin Yellow -medium

- designed for installation behind brake lights -soft and flexible
- stiffer than the green version

It pushes out moisture -and keeps it out with pressure that holds down the edges behind that bothersome third brake light.

It has an arched, curved body that gets behind the brake light to apply the constant pressure required to keep moisture from seeping back, thus allowing the adhesive to grab. Designed with two holes in the body of the tool for a better grip.

150-034

THE CHIZLER -standard

Bigger than his little brother shown above. Will not damage defrost liners on the rear window.

150-034

price per piece

150-033

LIL' CHIZLER

Small and thin squeegee for small areas like the triangular windows, or for squeezing small air bubbles away. Also perfect to remove dirt and old adhesives from the rear window. Will not damage defrost liners on the rear window.

150-033

price per piece

150-020

Size: 39cm x 15cm

THE BULLDOZER I (car tinting applications)

- with one hand tied behind your back you will be able to:
- squeegee behind speakers, 3rd brake light, low-lying rear windscreens...
- no more scraped knuckles...

Specially designed plastic squeegee, extra large and extra wide. The design allows you to apply film firmly in those hard to reach areas. The squeegee adapts itself perfectly to the curve of the window. The end of the blade is fitted with a rubber strip to remove the last, tiny drops of moisture.

150-020 price per piece

150-021

Size: 39cm x 15cm

THE BULLDOZER II (flat glass applications)

- with one hand tied behind your back you will be able to:
- squeegee behind radiators, desks, semi-exposed pipes and the like...
- no more stress...

Specially designed plastic squeegee, extra tall and extra wide. The design allows you to apply film firmly in those hard to reach areas. The squeegee adapts itself perfectly to the curve of the window. The end of the blade is fitted with a rubber strip to rinse off the last, tiny drops of moisture.

150-021 price per piece

150-008

THE CONQUISTADOR

Specially designed squeegee for the installation of windowfilm in hard to reach areas. It's ergonomic design is perfect for applying film in tight & sharp angled corners.

150-008 price per piece

150-008S

THE CONQUERER (the original one)

Nothing beats the original Conquerer. This squeegee is the favorite per excellence with experienced car tinters because it is the tool of choice to mount window film nicely in the dot matrix (grids).

What is the difference with the other versions?

- ☒ The rubber strip on the squeegee does not melt at high temperatures.

150-008S price per piece

150-046

Size: 38cm x 8cm

THE TITAN

- ultimate versatility

This special squeegee solves the two main problems experienced during the application of window film on to convex rear windscreens and side windows.

- 1: Its long, sturdy but flexible form makes it the perfect squeegee for applying film to very deep and low-lying rear windscreens.
- 2: The profile variations at the back of the squeegee allows it to work the window film in to corners and between the window seals in a number of different ways. Manufactured from sturdy, flexible and unbreakable plastic.

150-046 price per piece

150-026

THE YELLOW QUICKFOOT

- medium hard

Stiff, smooth plastic squeegee for applying automotive window films in hard to reach areas. This squeegee fits into a variety of differently angled corners, and its long narrow end is perfect for pushing back rubbers.

150-026 price per piece

150-180

Quickfoot Blue - Soft

- flexible

When you need a stiff squeegee with a handle for jobs that require medium reach, Quick Foot is the perfect "in-between" tool. Quick Foot is slim and trim like Slim Foot, but has a shorter, unwrapped handle so it fits more easily in your tool apron. This economically priced hybrid gives you a range of flex rating options to meet a variety of applications.

150-180 price per piece

150-170

THE SLIMFOOT

- squeegee for hard to reach areas - 36cm long - 15cm wide

THE SLIMFOOT: Special thin, long squeegee, for example for use with flat rear windows, when squeezing is difficult.

150-170 price per piece

150-035

5-WAY TOOL

Helper for holding window film adhesive film taut on windows at edges and corners during cutting. This grey version is made of soft pliable plastic and has rounded corners, so that the window film will not damage when slid or placed in a corner. These are the 5 possibilities of using the 5-way tool:

A rounded short bevel that allows foil to be carefully pushed into a difficult corner.

A short bevel with a 10cm long straight edge that enables this side to be so used as a regular squeegee.

A 90-degree angle, where the film can be cut directly on both edges.

A 26cm straight edge that can be used as a cutting ruler and guide.

A large diagonal angle (80 degrees), so that one side can already be cut while on the other side the film may still need to be squeegeed to the edge.

150-035 price per piece

150-060

Go Doctor Red - Soft

- soft

The Go Doctor Red window film squeegee features an "i-beam" handle construction which fits comfortably in your hand. The design provides greater efficiency and less fatigue. This Red Go Doctor blade is the softest of the three blades and is perfect for thinner window films and paint protection films.

Replacement: blade: 150-060-R

150-060 Price per piece

150-062

Go Doctor Yellow - Medium

- medium Firm

The Go Doctor Yellow window film squeegee features an "i-beam" handle construction which fits comfortably in your hand. This design provides greater efficiency and less fatigue. This Yellow Go Doctor blade is the medium-firm blade and is perfect for window films of all kinds, paint protection film, auto wrap installations and vinyl graphics.

Replacement: blade: 150-062-R

Go Doctor Blue - Hard

- firm

The Go Doctor Blue window film squeegee features an "i-beam" handle construction which fits comfortably in your hand. This design provides greater efficiency and less fatigue. This Blue Go Doctor blade is the firmest of the three blades and is perfect for high performance and thicker films.

Replacement: blade: 150-061-R

150-061 Price per piece

150-059

Stroke Doctor - Firm

- 17.5 cm wide
- soft touch grip

Developed for wipe out hard to reach areas during installation. Perfect for squeegeeing out window film at the bottom of a rear deck or windshield area.

Replacement blade: 150-059-R

150-059 Price per piece

150-063

The SIDE SWIPER - 15cm

- optimal pressure on the tip
- ideal for difficult to reach places

The SIDE SWIPER is a unique squeegee designed for installing window films in difficult to reach places. Thanks to its special shape it has many advantages. **Handle:** This makes it easier to get your hand and squeegee into narrow and difficult places, such as sloping car rear windows. Your hand lies further behind the squeegee, which extends your reach.

Body: the body of the squeegee is made of sturdy plastic and allows you to apply force. The body is completely rounded and gets smaller to the tip, so it cannot damage the film.

Rubber strip: the (replaceable) strip works like a squeegee and because of the considerable force you can put on the tip, it is very easy to push away all the remaining moisture at that spot.

Replacement blade: 300-PM15-S

150-063 Price per piece

BIG TURBO squeegees

With a larger diameter and black rubber strip, the Big Turbo is an ideal squeegee for quick installations of window films on glass in buildings. The larger tube lies better and firmer in your hand so that you can apply more force without in, or tiring your wrists. In short: a good addition to your toolbox.

Large diameter handle: 4 cm
Better grip in your hand so less fatigue while squeezing.

150-113

10cm

BIG MINI TURBO squeegee -10cm

- width: 10 cm

This Big Turbo Squeegee has the same large diameter of the tube as all of his wider brothers. Due to its narrow width of 10cm, this squeegee is ideal for fitting in window film at the edges of rebates. This squeegee is also often used as a cleaning squeegee to pull away and remove any dirt in the water at the sides of the window.

150-113 price per piece

150-112

17cm

BIG TURBO squeegee -17cm

- width: 17cm

The Big Turbo Squeegee is the squeegee to apply large areas in one go. The advantage of the Big Turbo squeegee is the larger diameter of the tube with which it is held. Therefore, you can apply more force without tiring your hand and wrist. The black rubber blade is medium stiff. On the sides of the tube are ridges for extra grip which prevent the tube from slipping and sliding in your hand. This version has a width of 17cm.

150-112 price per piece

150-111

23cm

BIG TURBO squeegee -23cm

- width: 23cm

The Big Turbo Squeegee is the ideal squeegee to apply large areas in one go. The advantage of the Big Turbo squeegee is the larger diameter of the tube with which it is held. Therefore, you can apply more force without tiring your hand and wrist. The black rubber blade is medium stiff. On the sides of the tube are ridges for extra grip which prevent the tube from sliding and slipping in your hand. This version has a width of 23cm.

150-006

SOTT

The SOTT® MAX -13cm

- soft but resilient

The SOTT Max is by far one of the most important squeegees that a window tinter should have in his/her possession. Due to the combination of stiffness and flexibility, the squeegee gives an enormous pressure during squeegeeing, so moisture can often be pushed away at once. Especially for window films and safety films on flat glass.

Perfectly combine with the following grips:

150-042S, 150-042SM, 150-042, 150-042L, 150-014, 150-039

150-006

WOODY GRIP Squeegee -ultimate tool for Safety Films

- wooden handle for 2 hands at the same time
- the Ultimate tool for Safety Films

The WOODY is a block squeegee where pressure can be applied with two hands at the same time. The advantage is that one does not have to squeegee over the same spot several times, as the pressure is so high that only one or two strokes are necessary. This squeegee makes working faster and therefore more efficient. This is Indispensable if you need to apply window film to many large windows.

Now you can install safety window films thicker than 200 microns with ease without the risk of leaving a lot of water underneath.

150-054

High performance hand grips For more Power

If you want a perfect installation of window films, these hand grips are your best friend. On this page you will find the small versions. Simply insert the desired squeegee into one of these hand grips and you're ready to get your job done!

Perfectly combine with the following squeegees:
150-006 Sott Max, 150-006S Sott Max Angled, 150-007 Blue Max,
150-050 Clear Max, 150-012 Orange Crush 130, 150-048 The Hybrid 130

150-014

13cm

PERFORMAX Hand Grip

Sturdy cast iron hand grip for use in conjunction with special soft squeegees. The Performax offers tremendous grip and allows extra pressure to be exerted on the squeegee during wet applications. Ideal for use on large areas of wet application such as self adhesive film on to acrylate and composite sheet materials, but especially suitable for window films and thick security film applications. The allen screws for attaching the squeegee are countersunk so they can not damage your work.

150-014 PERFORMAX Hand Grip price per piece

150-042S

13cm

SOTT

SOTT-5 Hand Grip

Special handle, made of high-quality plastic, for clamping special squeegees. These handles have a better and longer grip, so they can be held securely without getting tired of squeegeeing. In addition, it is extra comfortable because the grip area is covered with a non-slip foam. Due to the curved shape and the special smooth plastic, the handle will not touch or damage the film when a lot of pressure is applied to it. This is the handle for soft squeegees, to squeeze films with the wet method. Particularly suitable for thick and hard films such as security films and window films.

150-042S SOTT-5 Hand Grip price per piece

150-042SM

13cm

SOTT

SOTT-5 Short Grip handle -extra short

- short handle: 8cm

Same as 150-042S Hand Grip except shorter handle. This strong heavy-duty handle is ideal for use in small areas where space is limited. Often the handle is too long and you can't rake properly because the back piece gets stuck. With a handle length of only 8cm, it does not stick out from under your hand and you can squeeze it perfectly in small spaces while still being able to use force to push moisture out from under the film.
Made of strong nylon.

FUSION TOOLS

FUSION-5 Hand Grip

FUSION hand grips offer an improved and extended grip reducing fatigue from squeegee work during those long applications. Extra comfort is provided by the anti-slip foam coating on the actual gripping area. The curved form of this special smooth plastic hand grip prevents it from coming in to contact with film when extra pressure is applied, so any risk of damage to your work is eliminated.

This is the ultimate hand grip for squeegees used for the wet application of film. Perfect for use with thick and hard films, such as security film and window film.

150-042 Fusion-5 Hand Grip price per piece

150-039

13cm

SHORT-13 Hand Grip

- rubber anti-slip handle

The SHORT-13 is an ideal handle for installing window films in environments where space is limited. Because the handle is only 10cm short, it can easily be used in any angle and environment. Think of rear windows of cars, side rear windows in compact or hatchback models, etc. The rubber handle prevents slipping in situations when hands are wet.

The plastic squeegee is simply clamped into the jaws (note that it is not secured with screws). Intended for squeegees of 13cm width.

Perfectly combine with the following squeegees:

150-006 Sott Max, 150-006S Sott Max Angled, 150-007 Blue Max, 150-050 Clear Max, 150-012 Orange Crush 130, 150-048 The Hybrid 130

150-043

FUSION-8 Hand Grip

- 200mm (8") wide; indestructible plastic

An exceptional hand grip, extra wide, manufactured from high quality, unbreakable plastic for use with special squeegees. FUSION hand grips offer an improved and extended grip reducing fatigue from squeegee work during those long applications. Extra comfort is provided by the anti-slip foam coating on the actual gripping area.

The curved form of this special smooth plastic hand grip prevents it from coming in to contact with film when extra pressure is applied, so any risk of damage to your work is eliminated.

This is the ultimate hand grip for squeegees used for the wet application of film. Perfect for use with thick and hard foils, such as security film and window film.

The following polyurethane squeegees can be used in combination with these holders:

150-051, 150-049 The Hybrid 200.

150-043 Fusion-8 Hand Grip price per piece

FUSION STRETCH

FUSION STRETCH HANDLE -extra long grip

- extra long grip: 40cm (16")
- available in 2 widths: 130mm (5") and 200mm (8")
- indestructible plastic

Example:
FUSION Stretch grip
with squeegee

Unique squeegee holder as the standard Fusion-series, but with an extra long stainless steel grip.

Because the grip is no less than 40cm (16") long, an enormous amount of pressure can be applied when squeegeeing window films. This makes installing less tedious: ideal for large windows.

The following polyurethane squeegees can be used in combination with these holders:
150-006 Sott Max, 150-006S Sott Max Angled, 150-007 Blue Max, 150-050 Clear Max, 150-012 Orange Crush 130, 150-048 The Hybrid 130, 150-051 Orange Crush 200, 150-049 The Hybrid 200.

Heavy Metal Power Handle Squeegees

Power Handles are ideal squeegees for the application of window films where extra pressure is needed during the pushing away of the moisture under the film. These squeegees are used especially for thick window films such as security films.

Available in two edges

The metal frame provides stability and does not bend under pressure. The handle has small recesses so that wet hands still have a good grip on the handle. The replaceable nylon squeegee in the frame is medium stiff, available in different sizes and shapes.

Rubber grip with recesses avoids slipping when wet.

Strong curved metal neck for better angle.

Metal body holds the squeegee in place.

SOTT

SOTT® WRAP TWEEZERS

Handy tools for easy installation in hard to reach places

*Win the fight
with small corners
and seams*

Each car wrapper and film installer knows:
pushing vinyl into small corners and cutting or wrapping around
hard to reach areas can be quite a fight.

Specially designed for those tricky jobs are SOTT WRAP TWEEZERS.
3 different types of tweezers, each with its own purpose.
Now you master every little part on the car. Made of stainless steel.

WRAP TWEEZER-I

- flat round nose
- pulls the vinyl without destroying it

The stainless steel Wrap Tweezer-I has a special flat round nose that can hold the vinyl without the risk of tearing it while pulling it around corners. Cut the vinyl to size, heat it up and guide the vinyl around corners using the rounded tips. You're done.

350-311

price per piece

WRAP TWEEZER-II

- curved end, with point
- extra thin and precise

Stainless steel tweezers with curved ends. Both points are sharp and fit well together so that vinyl can be easily picked up within cracks, seams, headlights and taillights, etc.

Whenever there isn't anything else that can be used to get the vinyl in deep crevices of the car, the Wrap Tweezer-II is the solution.

350-310

price per piece

SOTT TWEEZER

- round shape, flat inner surface
- sharp point

This coated pair of tweezers has a sharp pointed nose that curves on the outside while being flat on the inside.

Ideal because now you can keep your grip when handling the vinyl while the outside, due to its curved shape, doesn't stick to the vinyl.

350-201

price per piece

THE SQUAD™

**A challenge for all film installers and sometimes (almost) impossible:
placing and pressing down adhesive film into small corners, gaps and holes. Wouldn't it be great if there was a tool for that!
Oh yes, SOTT sells it. A pair of elongated squeegees that work together as a team to tackle any job. Here they are: The Squad.**

These specially shaped squeegees are designed to apply any type of film in hard-to-reach places. Whether it's for wrap film, window film or interior film, thanks to their various special tips these tools can literally be used anywhere and in any situation.

They are made of durable plastic so that they will not break, fray, buckle or curl easily. Several of the tips have sharp flat edges, to make it easier to push them into the smallest gaps. Despite this your film will not be damaged because the tip material is smooth and shows no burrs.

In short, a must-have for every installer who relies on fast and efficient work methods. Supplied as a set in its own case.

150-088 The Squad Price per set

THE SQUAD™

ALL THE ADVANTAGES

The smooth semicircular curved shape allows the installer to press down adhesive films behind seams and edges. Ideal for spots that normally would be out of reach.

The curved tip tapers off and is ideal for pushing film into corners and giving just that little bit of extra pressure to the rear side of edges, panels, doors etc.

The Crawler

The Factotum-II

Due to its smooth tapered shape, it is ideal for pushing all kinds of film into any conceivable shape without damaging it.

The Factotum II saw some improvements over version I. The tip tapers off and has a sharper edge. It is stiff, yet flexible. This allows a lot of force to be applied when pushing film into the smallest of channels and creases, but it won't break.

The tapered tail is quite stiff, yet flexible enough to push rubbers away from windows and other vehicle body parts. Because it is tapered and very smooth, it is a great tool for positioning window films before the water is squeegeed out from behind it.

This is useful too: use the rounded tip for scraping off adhesive and small pieces when removing film.

400-255

TOOLBAG MINI

- 4 storage compartments
- belt included

This mini tool bag has a width of 13 cm and is ideal for installers who only need few a different tools for their installments. The tool bag has 3 compartments on the front and a hidden compartment on the back. On the front there is also a loop to attach a tape measure.

400-255 price per piece

100-030

CUTTING KNIFE HOLDER for carton film box

- turn your foil box into a cutting dispenser
- cut your film directly from the box

Small aluminum knife holder that is easy to place on the edge of the film box so you can cut your film to a specific width directly from the box.

How does it work?

1. Turn back the socket at the slot so that the slot is completely free.
2. Clamp a snap-off blade into the slot, sharp side down.
3. Tighten the socket so that the bolt clamps the break-off knife.
4. Now place the knife holder on the edge of the box, with the shear blade pointing inward, towards your foil inside the box
5. Now pull your foil up a little and insert the foil through your knife blade.
6. Now gradually pull your foil up in one smooth motion, as far as you like.

WE RECOMMEND
these break-off blades are the best
for this application:
NT blades 30° 120-BD-100A or
OLFA blades 30° 120-SAB10.

TIP: tape the beginning of your film to a tube so that you have the same tension over the entire width when pulling up and cutting through.

SOTT

SOTT® AIR RELEASE TOOL -aluminium body

- with retractable needle
- aluminium version
- professional quality

The SOTT AIR RELEASE TOOL has the size of a pen and lies well in the hand thanks to its thickness and non-slip front.

The ultra thin and sharp needle gives you the ability to accurately and very locally prick away air bubbles. The needle is by means of an internal spring to pull so that this bubble piercer safely stored. The needle is not replaceable.

100-NP-1

price per piece

100-NP-2

AIR RELEASE TOOL -black

- ballpoint model
- with retractable needle

Air release tool in ballpoint shape with razor-sharp needle inside. Simply click on the back and the needle comes out of the shaft.

Click again and the needle will retract. Ideal for film mounts where air bubbles have formed between the film and substrate. Delivered in luxury box. The needle is not replaceable.

100-NP-2

price per piece

350-221

INJECTION NEEDLE -ultra-thin .45

- 0.45mm thick
- bevelled tip for invisible film penetration

By using this syringe together with the 350-220 syringe you have the solution to suck out moisture bubbles under paint protection films (PPF).

How does it work?

Pierce the needle horizontally in the bubble and suck the water into the syringe. Take the needle out of the vacuumed bubble and press the small hole closed with your thumb. Within a few hours, the hole will be invisible and 'healed'.
Violá, your perfect assembly is ready!

350-221

price per piece

350-220

INJECTION SYRINGE -10ml

The ultimate solution! A Must-have for every PPF installer!

Every PPF (paint protection) installer knows it: somewhere in the middle of the bonnet a big water bubble. What can you do about it? Pull off the complete film and start all over again? Not at all. You don't have to! Just use a syringe with an ultra-thin needle to make an invisible hole and suck the moisture out of the bubble!

How does it work?

Pierce the needle horizontally into the bubble and suck the water into the syringe. Remove the needle from the emptied bubble and press the small hole closed with your thumb. Within a few hours, the hole will be invisible and 'healed'.
Violá, your perfect fitting is ready!

SOTT

CUTTING- & CONTOURTAPE -6mm

- define cutting lines before install ppf film
- define working lines* on any vehicle
- position lettering along a predetermined line
- create a flexible ruler for cutting purposes

This 6mm (.25") plastic tape is a revelation for every fitter. Easy to stretch and shape, does not leave adhesive residue. Quite thick, so doesn't tear or break easily. Cutting and Contour Tape is ideal for:

Defining working lines:

Define working lines on curved or wedge shaped cars. This will create a fixed working line that will follow the form of the car. Use this line as a reference for positioning your sign to ensure that it is visually correct.

Establish cutting lines:

If film needs to be cut to follow a desired form then Cutting and Contour Tape is the ideal solution. First apply the film, use the tape to create the desired form, and then simply cut carefully along the tape. The red and blue panel shown on the photo can be cut entirely freehand. The top of the full colour print that runs away slightly at the top can also be cut perfectly using the Cutting and Contour Tape.

Defining working lines:

Defining simple working lines before starting the application of any lettering will enable the correct layout of text and logos. Tip: use fixed reference points, such as the corners and edges of doors and panels. This will simplify the layout of the opposite side of a vehicle as well as making any future repairs much more straightforward.

PPF bulk installation with cutting tape

Use this tape to place the correct cutting lines. Then install the PPF film as you normally would. Now cut through the ppf film, and on top of the cutting tape. Pull the cutting tape from under the ppf film while spraying water under the film. Result: nice cut and the paint is not touched.

A working line is an invisible contour reference line running horizontally over the length of the vehicle. Some cars already have a working line added during the forming of the bodywork. However, this is becoming less common in the more recent car models.

350-204 price per roll

350-205

Size: 50mm x 50m

APPLICATION AND POSITIONING TAPE -50mm

Do you need to layout text and large prints before final application? This industrial class tape is a hefty 5cm (2") wide, has strong adhesion, but leaves no adhesive residue, even after several weeks. Not affected by water.

An ever-increasing number of bodywork components are being manufactured from composite materials. This is why you need Application and Positioning Tape.

SOTT

ROLLEPRO®

- install film over rivets, in channels and on bricks in no time!

The well-known RollePro is the only tool that really works for installing film around rivets and applying wall films to brick or stone walls. The RollePro has a hard foam wheel that presses the film into and around curved or uneven surfaces. Install the film over the surface, warm it up and roll the RollePro over the shape or surface. Keep pressing firmly until the film has cooled off, then heatfix and you're done.

Warm up the film and roll RollePro simply over rivets channels, grooves or joints.

In this image you can see that the hard foam wheel easily takes the shape of the curved surface.

Even coarse bricks are no problem. The RollePro easily pushes the film into irregularities of stones, bricks and joints.

150-047

price per piece

150-201

SOTT

SOTT® ROLLER -heavy duty

- 150mm (6") wide
- top-heavy version; with bearings

Professional roller mounted in ball bearings and intended for intensive use. Top heavy means that the actual rubber roller is the heaviest part of the tool allowing extra pressure to be exerted during application procedures. This is especially evident during the application of large areas of film. Less pressure needs to be applied as the roller does most of the work.

Ideal for:

- applying large areas of film without air channel technology but solid adhesive.
- applying application tape.
- applying laminate.
- applying high tack films on flat substrates.

The rubber roller is bearing mounted and so runs exceptionally true, offering highly efficient and effective rolling.

A good example of the use of the SOTT ROLLER: Covering large surfaces (such as a table) on your own with for example an interior film with a very strong adhesive can be a challenge. With a roller, it is very easy and hassle-free. The roller gradually presses the film onto the surface without tension or stretch, while a squeegee pushes the film away slightly. On large surfaces, this can then cause a little film tension. Not with the SOTT ROLLER!

It's bigger It's stronger It's **THE GOLIATH!**

All film installers and signmakers use them.

The mounting magnet. With larger pieces of vinyl, however, one magnet just isn't enough. We have something better for that task. An extra-strong magnet, with a special handle. It's a monster! We call it The Goliath!

SOTT® GOLIATH MAGNET -extra large

Super
Strong
and NO
Mistake

Mounting Magnets are now indispensable when installing vinyl and other films.

But we missed a satisfying solution for holding up large sheets of film with just one tool - frustrating!

That is why we designed this special mounting magnet assembly and while we were at it made it multifunctional as well.

Specially designed for the true installer who appreciates efficiency and convenience while he works.

More than 24kg of pull!
Replaces 4 ordinary magnets
Multifunctional!

The 5 advantages of The Goliath

EXTRA STRONG: MORE THAN 24kg OF PULL!

Nothing is more annoying than magnets and film fall down whilst positioning. The standard magnets often turn out to have too low a magnetic force, which means you end up using several magnets to do the job. Thanks to The Goliath this is a thing of the past. The base contains 6 Neodymium magnets that together develop a minimum of 24kg pulling force. The Goliath is so strong that one of them can hold up a 1,52m x 5m of film. So just clamp it down with The Goliath and start installing!

LIGHT GREY BASE FOR BETTER DIRT CONTROL

Avoid stains caused by your tool. The Goliath has a light grey rubber base that shows dirt well. By cleaning it regularly you can be sure that the magnet won't leave any dirt traces.

ROUNDED HANDLE: PREVENTS DAMAGE TO THE FILM

Often during installing the upper part of the film drops over the magnets, causing ugly kinks or folds in the film. The Goliath however, has a rounded top to prevent this.

10mm (0.4") HOLE FOR ADDITIONAL ACCESSORIES

Toward the top of the handle there is a 0.4" (10mm) hole. This creates interesting possibilities for The Goliath. Available accessories are simply stuck into the hole, creating a whole new functionality for it.

150-MM883 Goliath magnet Price per piece

ATTACHMENTS for THE GOLIATH

There are 2 different attachments available that add a completely new function to The Goliath. In an instant create a third hand when working with the hot air gun or create a special rack for your squeegees and fluids*.

HEAT GUN HOLDER: Ideal for high installation areas

150-MM884 Heat gun Holder

Don't you find it annoying to continually have to put your hot air gun away and pick it up again whilst installing? Make it easy on yourself by using the special holder. Simply insert the holder in the holes of The Goliath and stick it anywhere on the car body. Ideal if you are standing on a ladder working on the roof.

For more information about this product, check page 103

DISTANCE BRACKET: Keep your tools off the ground.

150-MM885 Distance Bracket

Use The Goliath in combination with the special bracket to create a convenient dispenser for hanging your towels or bottles on, so they don't stand on the floor. Or attach your rubbish bag to the bracket and keep your workspace clean.

For more information about this product, check page 103

Forget all standard magnets

INTRODUCING the SOTT Magnet

150-MM882

Note: Order quantity per piece

SOTT

SOTT® MOUNTING MAGNET

Just about every signmaker, carwraper and film installer uses them.

Mounting magnets. This handy tool keeps the sheet of film on the car body during positioning and installation. There are many types and shapes available, always with some kind of problem: too sharp, handle too small, the rubber rubs off or simply not powerful enough. Here is the SOLUTION:

A mounting magnet designed by people who really gave it some thought and that combines many advantages into one. Forget about the rest. From now you'll only want to use the SOTT mounting magnet.

THE MUSCLE MAN: More than 7,5kg of PULL!

A common complaint of film installers is that mounting magnets often lack just that little extra in force. The SOTT mounting magnet solves that issue. The base contains 6 Neodymium magnets that combine into a magnetic force of over 7.5 kg.

As a result, fewer magnets are needed in one place to keep the sheet in place, which won't fall readily off the car.

LIGHT GREY BASE FOR BETTER DIRT CONTROL

Avoid causing stains with your tool. The Magnetor has a light grey rubber base that clearly shows dirt settling on it. By cleaning it regularly you can be sure that the magnet won't leave any traces of dirt.

ROUNDED HANDLE: PREVENTS DAMAGE TO THE FILM

Often during installing the upper part of the sheet drops over the handles of the magnets, causing ugly kinks or folds in the film at the spots where it touches the handle. SOTT mounting magnets, however, has a rounded top to prevent this from happening.

Available individually and per 5 in a box.

150-MM882 Price per piece

150-MM884

Note: The SOTT Heat gun Holder only works with two magnets type: 150-MM883 The Goliath.

Please check PAGE 100 for more information.

SOTT

SOTT® HEAT GUN HOLDER

- special holder for your hot air gun - always at the ready

Simply use the special attachments for the big SOTT mounting magnet 150-MM883 The Goliath. This metal bar is inserted into the holes of the magnet handles, one on each side and presto! you have a real holder for your heat gun. Because the body is metal there won't be problems with the hot nozzle of the gun, which is perfectly protected in the round tube. From now on, no more trouble with laying down your hot air gun or finding it again.

IDEAL FOR INSTALLING IN HIGH PLACES

Always difficult: installing film and using a hot air gun on a roof or high on the side of a vehicle. Where to put the heat gun? No more bending, picking up, heating the film, carefully putting away, applying the film, etc. That is over! From now on you won't have this problem any more. Just place the holder and you can apply, heat up, stretch, apply, heat up, stretch, etc. much faster.

Product information:

The SOTT Heat Gun Holder is made of durable black passivated metal so it's corrosion-protected.

150-MM884 price per piece

150-MM885

**Note: these accessories require two Goliaths.*

Note: The SOTT Heat gun Holder only works with two magnets type: 150-MM883 The Goliath.

Please check PAGE 100 for more information.

SOTT

SOTT® DISPENSER

- your 3rd hand during installation

Materials and tools often clutter up the space around the vehicle during installation. What could be nicer than a handy bracket to hang your cloths and spray bottles? Installers often find they just haven't got enough hands for everything. A third hand would be so welcome. We have the solution for both problems.

CLEAN AND ORGANIZED WORK

Workshops usually look like this: rags and degreaser spray bottles everywhere and installers running around cars looking for them. Simply use the SOTT dispenser to keep all the articles off the floor, so that everything stays clean - plus you have everything within reach.

*YOUR 3RD HAND WHILST PRE-STRETCHING

The newest method to wrap small round shapes such as a door handles, antenna bases or mirrors, is to pre-stretch the film to stretch and then, during the installation, to heat-shrink it again. The SOTT Dispenser is your perfect assistant! Attach the film to the bar and you can heat and stretch it as much you like.

The SOTT Dispenser simply fits into the holes in the handles of The Goliath mounting magnets.

With a length of 60cm it is the ideal bar to pre-stretch the vinyl before you start wrapping, say, a mirror.

Hang your cloths, spray bottles, etc. on the SOTT Dispenser and your tools will stay clean and be at your fingertips.

Product information:

The SOTT Heat Gun Holder is made of durable black passivated metal so it's corrosion-protected.

SOTT

SOTT® PROFESSIONAL TOOLBAG

- the most versatile toolbag available

Professional installers often find themselves doing acrobatic feats to get to their tools whilst working. SOTT wants to respond to the needs of installer. So SOTT designed a special ToolBag which fully meets the requirements of professional installers across Europe. Behold the outcome.

The HeavyDuty belt is not included. Please order this item separately.

MAGNETIC COMPARTMENTS

There are magnetic plates sewn into the material to conveniently stick your installing magnets.

BLADE STORAGE COMPARTMENT

No more old dull blades lying around! Put them into the special section in the 120-OLFA AB10 or 120-DB blade box. This box is specially made for this purpose.

SPECIALLY DESIGNED KNIFE COMPARTMENTS

8 knife compartments with custom depths of 8 and 10 cm to make sure your knives always peek out a little. This way you can grab and return them quickly.

SAFE TAPE MEASURE HOLDER

The tape measure holder is made of sturdy plastic to avoid inadvertent damage when you lean against a car.

STURDY PLASTIC STRAP

SOTT chose to use a sturdy, industrial-grade strap that doesn't bend or collapse when your TOOLBAG is filled with tools.

QUICK ACCESS SQUEEGEE POCKETS

The TOOLBAG has 2 extra pockets with adjustable depths for squeegees that you want to grab without looking.

EXTRA MAGNETIC POCKET

On the front there is another magnetic pocket underneath the material to stick metal tools or screws. Ideal and very clever!

MOUNTING TAPE HOLDER

On the bottom of the TOOLBAG there is a belt with a quick release. Attach your mounting tape there to quickly grab it when you need it.

PROTECTED AGAINST DAMAGE

SOTT's TOOLBAG is especially made of industrial-grade textile material and has an elliptical shape to reduce the change of scratching the vehicle.

SPECIAL SHAPE

SOTT's TOOLBAG has one large compartment in the middle for gloves, wipes, etc. It has a special shape, so it doesn't bother you by wiggling between you and the vehicle. This reduces damage-prone situations.

There is a special Toolbag bar available for large squeegees etc. Look on the next page.

SOTT® TOOLBOX

- everything you need, carried in 1 toolbox

A standard toolbox can't contain all the tools you need during a carwrap job. As always, you just don't have not enough compartments for your special knives and squeegees, bottles will topple over and so on. But not anymore! Now you can have the SOTT Toolbox.

Bigger = Better
Up to **200%**
more space!

LARGER FORMAT: VOLUME 30 liter.

With a slightly bigger footprint of 52cm x 30cm the SOTT TOOLBOX has a capacity of 30 liters. So you will have everything you need right by your side.

22 ATTACH STRAPS

Along the inside of the TOOLBOX are 22 tool straps for you to store your tools. They are designed for quick access, just as everything about this tool box is!

QUICK ACCESS POCKETS

Knives and pens are easily accessible for use on the front of the box and there is space for your mobile phone as well.

18 COMPARTMENTS

As many as 18 compartments on both sides for your squeegees, blade holders and many other tools and materials.

2 BOTTLE HOLDERS

The SOTT TOOLBOX comes with two additional bottle holders that can be attached to the TOOLBOX with Velcro. Now you can take up to 4 (Spray-)Bottles along without them toppling over.

RULER HOLDERS

As many as 4 sturdy straps with Velcro hold your longer tools, such as cutting rulers.

STAINLESS BRACE WITH HANDLE

Comfortable to carry thanks to the strong stainless brace with handle.

TAPE MEASURE HOLDER

On the back there is a strong metal clip for your tape measure. Everything is designed for quick access.

SHOULDER STRAP

Standard supplied with shoulder strap that can be attached to the special braces on the box.

6 PLASTIC FEET

The box stands on 6 large plastic feet that avoid damage and soiling of the TOOLBOX when it sits on the floor and keeps it dry.

FILM SQUEEGEE-I

- easily apply film in the most awkward of places

A handy tool for every professional fitter. For both car wrapping and window film applications. Using this thin smooth plastic spatula, film can be worked in to the smallest corner and the narrowest of gaps without fear of damaging the film. Film can now easily be applied to the bumper seams, rear lights or roof rubbers.

The special slender shape enables the application of film in to all manner of seams and joints.

400-010

price per piece

400-009

FILM SQUEEGEE-II

- guide film between window and door seals, push in to joints

Film looks at its best when applied under the seals avoiding unsightly gaps. This handy tool is ideal for lifting the seals so that the film can easily be applied underneath. The Film Squeegee-2 is made of smooth plastic and is thin enough to avoid the seals being opened too much or getting damaged. This tool makes the application of film under door trims, window and roof seals a breeze.

The slender form of this tool enables seals to be lifted effortlessly.

400-009

price per piece

400-001

NYLON PUSHSTICK

Sturdy plastic spatula for pushing back or easing of rubbers around headlights and roof trims when applying film. Can also be used for positioning film in hard to access areas.

400-001

- **roll size: 25m x 15mm**
- **for sealing the edges pvc films, interior films and wrap films**

EDGE SEALING TAPE Clear is specially designed for sealing and protecting the edges of films. The tape is virtually invisible and is applied dry over the edge of the film and the substrate. This seals the edge of the film and prevents it from coming loose and curling up. Also, no dirt or moisture can creep under the film.

- Very long life for outdoor use
- Can be installed dry
- High permanent adhesion
- Cast pvc film
- No yellowing

400-011C Clear price per piece

600-995

Sealant DOWSIL 995 -high impact

- **extremely strong and resilient**
- **also works as a bonding between film and glass/frame**
- **305 ml**
- **colour: black**

This odorless industrial sealant with high tensile strength is ideal for structural bonding between (safety) window films and glass. The sealant also seals particularly well against corrosion, leaks etc. Good to use to bond window films to the edges of the glass/frame in situations where break-ins, falls through or explosions are a possibility. With one tube you can seal about 35 linear meters.

- Non-corrosive curing system. Fully dry and at strength after 20 days.
- Hardens into an extremely tough elastomeric rubber that ensures a durable, flexible, watertight bond.
- Excellent weather resistance and high resistance to ultraviolet radiation, heat and humidity, ozone and extreme temperature.
- Excellent adhesion without primer to numerous substrates including coated, tempered, and reflective glass and anodized, plastic or painted aluminum profiles including most fluoropolymer-based paints such as Kynar.

600-995 Zwart 305 ml price per piece

600-752

Sealant SILIRUB2 -normal

- **silicone sealant**
- **300 ml**
- **colour: transparent**

High quality sealant for sealing the edges of window films to prevent corrosion. UV resistant, long service life. Very good adhesion to all types of substrates except granite. With one tube you can seal about 35 linear meters.

600-752 Transparant 300 ml price per piece

600-3950

3M

3M® EDGE SEALER 3950

- **for sealing the edges of PVC films**
- **0.23 L can**

3M Edge Sealer 3950 is a colourless varnish that provides a water and dirt tight seal between the edge of self-adhesive PVC films and the substrate. It can also prevent curling of the edges.

Edge Sealer is resistant to water, mild acids and salts. Not resistant to hydraulic oils and greases. Edge Sealer can be removed with isopropanol alcohol and citrus-based cleaners.

How to use:

- Before you begin, test it out to make sure that the Edge Sealer does not affect the substrate.
- Substrate and film should both be degreased and clean.
- Make sure that the film edge is well pressed in accordance with the film manufacturer's guidelines.
- Do not dilute.
- Do not leave the lid off the jar for too long; this will shorten the life of the contents.
- Apply the sealer with a 6mm thin brush in one smooth motion.
- Make a 6-10mm seal edge, covering both the film and the substrate.
- Avoid gaps between different seal edges.
- Allow the seal edge to dry for 24 hours.

600-3950 0,23 L can price per piece

STANLEY MAX

STANLEY® MAX Tape rule -professional

No more mistakes due to inaccurate measurements.
Never again will your tape rule retract – catching your fingers in the process...
No more delays because of collapsing or bending tape rules.

Discover the advantages of proper, high-quality measuring tools!

A valuable addition to your tool kit and a sheer relief: finally you will be able to easily measure height without the blade bending due to wind or stand out.

You will be able to measure the length of an advertising board, neon sign or trailer, knowing the blade will stay straight and won't fall off the edge. These STANLEY MAX tape rules are ex-ceptionally sturdy, finally meeting the every-day needs of window film installers and signmakers.

- Rubber grip
- Mylar protective coating
- Bi-material case
- Belt clip
- Lock button
- Accuracy: class II
- Double top hook
- Hook grabs on side, top or bottom
- A special button allows you to slow down recoil
- Blade allows for stand out up to 270 cm without collapsing

HEX KEY (ALLEN WRENCH) SET - with ball head

- 9 tools: 1,5 - 2 - 2,5 - 3 - 4 - 5 - 6 - 8 - 10 mm
- with ball head on one side
- high quality chrome vanadium

An essential piece of equipment for each installer who regularly has to (dis)assemble car parts.

This 9-piece hex key (Allen wrench) set is used for removing or fastening allen-type hex bolts and screws. This hex key is a hexagonal bar bent in an L-shape. Depending on the available space and leverage required, use one end or the other.

The tip of the long end has a ball head so that hex bolts can be fastened or removed at an angle. Comes in a handy plastic holder. Contains the following sizes: 1,5mm - 2mm - 2,5mm - 3mm - 4mm - 5mm - 6mm - 8mm - 10mm

350-101 price per piece

400-019

WORKSEAT -with gas lift

- an end to backache!
- for easy movement around the car while applying your signs.
- no more tools lying around!

This is extremely convenient: a gas-lift work stool with a tool tray and castor wheels. The soft, comfortable upholstery keeps you comfortably seated even during lengthy jobs. Underneath the seat, a ring has been fitted with which you can operate the gas lift, adjusting the height to your exact preference.

The tool tray consists of three compartments for the tools you're working with, separated by a ridge.

The castor wheels include bearings and are made of hard plastic, with full rubber, durable and easy-rolling tyres.

Post-heating on the right temperature?

Testing is Knowing!

Heat-setting the film after working it into channels and recesses is a necessity. Whether this is done with a hot air gun or torch, one question remains: how do you know if the film has acquired the right temperature?

400-IR02
SOTT Infrared Meter

The SOTT Infrared Meter measures it for you. Fast and simple. You simply aim the laser at the object you are heating up, and the gauge will immediately indicate the current temperature. Added to that you can keep the last temperature reading by releasing the front button. An ideal and indispensable tool for any signmaker, car wrapper or interior film installer who needs to know whether the right temperature of the film has been reached. Includes a 9 volt battery.

3 ADDITIONAL FUNCTION BUTTONS

Light button for display illumination.

Set to Celsius or Fahrenheit.

The laser pointer must be turned on and off manually.

TECHNICAL INFORMATION:

Temperature range: -50~380°C (-58~716°F)	Service temperature: 0~40°C (32~104°F)
Accuracy: 1.5% (1.5°C) (2.5°F)	Service humidity: 10~95% RH
Response time: 500 ms	Storage temperature: -20~60°C (-4~140°F)
Spectral response: 8-14 μ m	Battery life: 22 hr (without laser), 12 hr (with laser)

INCLUDED:
9 Volt battery

SIEVERT®

CYCLONE GAS TORCH -with 13mm fine burner

- **reshaping or heat-setting is faster and has better results**
- **heat-set the film in those awkward places without heating the adhesive layer and substrate**

High quality gas burner - Sievert - Made in Sweden. Especially intended for working film and heat-setting in channels*. This burner produces tremendous heat allowing the correct film temperature to be achieved in a fraction of the time when compared with using a heat gun and a temperature gauge. The main disadvantage with a heat gun (paint remover) is that it also heats both the bodywork and the adhesive layer. This is highly undesirable as this is also the removal temperature. In short, a burner is the best solution for heat-setting film to all of those awkward areas.

Flame temperature: 1,925°C!!!

The tip of the blue flame reaches 1,925°C (3,500°F) and releases heat instantly. This is in direct contrast with a heat gun that supplies heat via an air stream.

The burner is moved quickly over the film surface, so it only heats the upper layer. The lower layer and the adhesive layer remain unaffected by the heat and so do not melt. The film itself is heated to a casting temperature (more than 205°C) in a fraction of a second, but cools instantly when the burner is removed.

The gas cartridge is replaced in an instant

The 300 ml cartridge makes the burner even more compact

The gas cartridges can be ordered separately.

ADVANTAGES:

- small flame: 13mm
- click-on-click-off
- electronic ignition
- no electrical power required
- extremely safe in use
- **highly economical; 80 cars per cartridge**
- lightweight system

400-BB-2235 Cyclone burner starter's kit
Supplied in a box with a 600mm cartridge.

400-BB-8708

INFRARED NOZZLE -no air displacement

- **does not blow hot air**
- **1700w of direct radiant heat**

Special attachment for the SIEVERT Cyclone gas burner. This attachment is special because it gives instant radiant heat from the flame inside it, without any blowing or air displacement. This lack of blowing ensures that your film does not get blown against bodywork as is often the case with hot air guns, or that surrounding areas of film are subjected to unnecessary heat. This infrared attachment provides instant radiant heat without affecting the flow of surrounding air. Manufactured from durable metal.

The flame from the burner is safely encased in the attachment so it cannot cause fires.

Solid construction in durable metal.

400-BB-8708

Simply Heat Up Corners and Fixate them together

The CornerSealer

Are there tools that can simplify film installation? Yes, definitely! SOTT introduces a selection of handy tools that no installer should go without.

Have you ever had small creases pop up at the corners of a wrap? Or small overlaps that lose their adhesion? This practical tool is intended for releasing the tension off installed film edges around corners.

The **CornerSealer** allows you to melt small creases or curly film edges and close or flatten them.

Within seconds, the flat head gets hot enough to melt the film.

Simply push the hot flat head against the crease or overlap and 'melt' the film(s) together and/or in place.

This effectively fixes the edge of the film until it is tension-free in its new shape. The flat head allows you to melt small creases or curly film edges and close or flatten them.

Perfect for:

- fixating the edges of wrapped film around corners
- melting together small film overlaps

HOW TO USE:

1. Make sure film is clean and degreased
2. Activate the device to preheat the flat head. This takes about 10-15 seconds (preheating time increases with deteriorating batteries). ATTENTION! Head can get hot!
3. Avoid skin contact to prevent injury
4. Place the flat head against the film area and push down firmly
5. Avoid overheating! 1-3 seconds of pressing is usually sufficient

ABS housing
Pocket-size
Works on 2 alkaline batteries
(not included)

RFX APPLICATOR for application tapes

Troubled by air bubbles or wrinkles when applying application tape to your film? Just use the RFX applicator.
This handy little tool is 30cm wide and totally removes any creases or air bubbles between your application tape and film.

500-017 price per piece

professional Roll Support

Simply and quickly slide the roll guide into the special position slots.

Perfectly finished endcaps smoothly slide into the position slots. This stabilizes the dispenser even more.

The dispenser comes complete with mounting brackets, screws and an Allen key. Just put it together and it's ready for use.

The dispenser comes complete with mounting brackets, screws and an Allen key. Just put it together and it's ready for use.

Corner brackets that can be mounted as needed so the dispenser "clamps" onto the table are included.

The two aluminium roller guides enable you to unroll your vinyl or application tape either from the top or the bottom.

The stable dispenser construction enables the perfect unrolling of wide film rolls, such as carwrap films, without any kinks or creases.

The roller guides are made from anodised aluminium with a metal profile along their entire length to prevent sagging

Rubber feet ensure it solidly sits on your table and they prevent damage. The dispenser can also be bolted to the table. A screw hole is provided for that purpose.

Has a perfect and safe finish thanks to its coated, solid metal build and rounded corners.

SOTT

CHROMED WALL RACK

- no more rolls toppling over
- up to 16 rolls stored on one square metre
- any roll up to 76cm (2'6") wide

There is nothing worse than having your valuable stock of film being stood up somewhere in a corner. Result: rolls topple over, dirt, dust, no control, no order, so an increased risk of making mistakes.

This rack solves all of these problems in one go. This fully chromed wall rack can store 16 rolls on a slight angle to assist in roll selection. All rolls hang perfectly in their place and any colour can be selected from this rack at a glance. Manufactured from chromed steel complete with fixing brackets.

Suitable for all types of film

SOTT

FLOOR RACK with solid ball bearing castors

- any rolls up to and including 152cm (5')
- 16 jumbo rolls stored on one square metre
- 16 jumbo rolls in one place without any toppling over!

Every printing and cutting studio is familiar with this problem. Several rolls in one place, searching between the rolls while still trying to stop them all toppling over. The FLOOR RACK is the perfect solution.

The FLOOR RACK ensures that your jumbo rolls will never topple over again in your studio. The rolls can be easily moved on the rounded chrome holders and are automatically held upright.

Plastic discs ensure that the ends of the rolls remain flat, clean and undamaged.

The entire system stands on 9 heavy-duty ball bearing castors, which allows the FLOOR RACK including rolls to be moved or manoeuvred as required.

An absolute must for any studio wishing to improve efficiency and where space is at a premium.

Store rolls fast

Fast and easy storage of rolls with no risk of damage

Rigid steel holders

Rounded chrome holders equipped with plastic discs ensure that rolls are stored perfectly, kept clean and remain undamaged.

9 solid castors

9 solid castors

The heavy-duty ball bearing castors allow the rack to be moved easily, even when full with rolls of film.

Perfectly
STRAIGHT
and
ANGLED
CUTS

Hang the Filmhandler on the wall or place it on a stand or stairs.

The FILMHANDLER -cutting device for window film

The FILMHANDLER

cut window film perfectly straight anywhere you like

- simple straight and angled cutting of window film
- the ideal solution for on-site cutting
- cut 2 or 3 pieces at the same time, perfectly straight!
- rigid aluminum frame

Cutting window film to size is not always easy. But with the Filmhandler, this is history. Simply place your roll of film between the holders and pull the film vertically down between the blade holders. Voilà, you have a perfectly straight cut. Now fold down the special clamping bracket against the film and now cut your desired size horizontally against the guide. The clamping bracket ensures that the film does not fall to the ground. Now you can pull any piece you cut out from under the bracket without the rest falling.

Lightweight; made of aluminium. Available in two sizes: for max 152cm rolls and max 182cm rolls.

The Filmhandler has 2 adjustable blades, so you can cut two or three jobs at once.

The roll holders are adjustable to any size.

Also, the roll holders have an adjustable braking system so the film won't accidentally unroll.

Size indication is in inches and cm.

Cut your window film vertically perfectly straight to your desired size.

Along the horizontal guide, cut the film to size.

Including extra spare blades: 120-FH

Yup, it's here: **HOZELOCK**

Goes SOTT

The First Unique Spray bottle developed by SOTT and Hozelock

- Heavy-duty components
- Builds up incredible pressure
- 1,25 ltr (42.3 oz) container
- Unbreakable hard shell container

Easy to read icons, specially designed for the professional industry.

How-to-use instructions are printed on the container.

Indication in two measurement units.

A must-have for every installer in the Signage-, PPF-, and Window film industry.

Adjustable spray head for fine-tuning.

Heavy-duty pump handle.

550-4075

SOTT

PRESSURE SPRAYBOTTLE SOTT®-HOZELOCK -1,25ltr

High quality pressure sprayer with 1250ml contence, for the moisturizing of surfaces and film. Not to be used for aggressive liquids or degreasers. In these cases use the SprayMaster (550-110).

For more info, read the ad-page.

550-4075 price per piece

550-4007

SOTT

PRESSURE SPRAYER SOTT-HOZELOCK -7ltr

Large pressure sprayer (7 l) with a 5 litre liquid capacity. The large reservoir is easily pressurized, and the long hose and special trigger allow you to spray large surfaces prior to applying window film. In other words: you can simply carry on with the job in hand without having to walk back and forth to the tap. The wrist cramp that often results from holding the trigger of ordinary sprayer bottles is a thing of the past as well.

The spray head (A) can be set for the amount of spray mist needed, and the pressure can be adjusted by turning a button (B) next to the handle.

550-4007 price per piece

550-110

THE SPRAYMASTER: The Ultimate Sprayer

- is not affected by chemicals, degreasers, cleaners, adhesive removers, acids or aggressive liquids!

You've never seen a sprayer like this! The Spray Master releases a powerful mist instead of just beads of moisture. With a range of up to 3 metres! The Spray Master has an enormous spread of spray and covers the entire surface with a 'cloud'. This mist is much finer than the beads of moisture normally associated with other sprayers. The turbulent spraying action not only ensures that the surface is more efficiently sprayed, but the resulting mist also 'pulls' any dust that happens to be swirling around out of the ambient air.

The remaining liquid content is displayed on the side of the bottle.

The sprayer of the Spray Master is especially developed to supply a high yield of spray per pump action. The Spray Master is also resistant to aggressive substances.

TURBULENT MIST OF THE SPRAYMASTER

One of the biggest advantages of the Spray Master is the turbulent mist that it creates. This not only achieves a greater range of spray, but also removes dust particles from the atmosphere.

550-110 price per piece

500-014

SOTT

DE FILMCATCHER

- no more grimy film
- no more wrinkled film

Format: 77 x 59 x 33cm

Keeping an eye on film when printing or cutting has always been a problem. How many times has your film left the machine and ended up a completely crumpled mess on the floor?

No more stress when using film in a **PRINTER** or **CUTTING PLOTTER**

This need never happen again. Simply install the Film Catcher in front or behind your equipment and from then on the run of the film is perfectly controlled. The Film Catcher is a durable and sturdy chromed steel bar construction with a smooth finish. Friction between film, banners or canvas is kept to an absolute minimum.

No more wrinkles or creases.

The rounded construction ensures that the film flows smoothly through the machine before being neatly collected. Creases often caused by the pure speed of the cutter plotter and the film ending up on the floor as a result are prevented.

No more dust and dirt

Nothing is worse than film or print work ending up on the floor covered in dirt, as it can ruin the whole job. The Film Catcher prevents your film or print work from ever landing on the floor again. One less thing to worry about! No minimum order.

RESULT?

The curved construction of the Film Catcher ensures that the film flows smoothly and is kept away from the floor, preventing the film from becoming creased or dirty.

When a film is being cut it is pulled back and forth over the floor and dirt getting on to the film would normally be unavoidable.

Perfect for cutting plotters

The Film Catcher solves the crease and dirt problems at a stroke: Simply install and get cutting.

The ideal solution in front of and behind digital printers

Front installation: The Film Catcher is the ideal solution for those printers not fitted with an automatic roll-up system. The film is neatly collected as it is printed.

Rear installation: When print work is removed from the printer there is always the risk that the end of the film will trail along the floor. The Film Catcher simply catches the end of the film before it has the chance to hit the floor.

SOTT

SOTT® WATERBOMB High Pressure Sprayer

- a must-have for any installer who wants to work quickly and efficiently

The SOTT WATERBOMB is the ULTIMATE high-pressure sprayer and is for every window film and PPF installer. No more messing around with small pressure sprayers that waste time needing to be re-inflated all the time.

The WATERBOMB can be pumped up to 6 bar with a hand pump or with a compressor giving you perfect pressure to spray the moisture on to your film or surface for the whole of your working day.

The barometer indicates how much pressure you have left in your tank. The inner casing is made of coated steel which will not rust and is not sensitive to chemicals and acids.

The SOAK'EM trigger is compact and easy to handle which makes it easy to use in small spaces. The special ultra-flexible hose is reinforced on the inside so that kinking, flattening or being run over is not a problem.

Storage compartment

Special storage compartment for small loose parts.

Extra large filling opening

Quick filling is easy with the large filling opening.

Heavy duty pump

Very strong brass pump with heavy duty metal handle.

2 adjustable straps

The two adjustable straps give you the option of carrying the tank on your back.

Compressor connection

Awesome! Pump up in the morning and all day sufficient pressure!

SOAK'EM nozzle

The SOAK'EM trigger made of durable plastic. The pressure can be regulated via the nozzle. The trigger is also lockable.

Integrated pressure gauge

Quickly and easily read the tank pressure on the built-in pressure gauge.

Rotatable connection

Unique: the connection between the nozzle and hose can be rotated without the hose rotating.

Blow-off/safety valve

Just press the button and all pressure is off the tank.

Flexible heavy-duty hose

This flexible soft hose of no less than 8,3m, is internally reinforced and can withstand a pressure of 15 bar.

Large foot + extra stability

The large foot stand ensures that the Water Bomb does not easily fall over during use.

Bottom connection

Because the hose connection is at the bottom, no residual liquid remains in the tank and again, it will not easily fall over.

WATER HOSE reinforced -8,3 m

Flexible soft water hose with a length of 8.3m. Specially designed for high-pressure sprayers such as The WaterBomb (550-WB10). This water hose with an internal thickness of 6mm, has a reinforced inner core so it can have a pressure of 15 bar. This high quality hose is resistant to pinching, kinking, oils and mild acids and salts. Both connections of 1/4" outside.

Reinforced inner core for high pressure and resistant against oil, mild acids and salts.

Swivel brass connector avoids twisted hose.

Ultra flexible and soft.

Fits perfectly on:

The Waterbomb **550-WB10**
SOAK'EM trigger **550-WSE**

SPEEDCLIP

- no more unsightly curled up pieces of tape

It's always been a problem: securing you rolls of film after use. Usually they are just taped up, but this often means that when the tape is removed the film gets damaged. Not anymore! Just use the Speed Clip.

This clip is made from a soft flexible plastic with a special finger recess allowing you to simply slide it along the roll without damaging the film. The clip then closes securely around the film holding the roll together.

Eliminates the chaos of unsightly taping

The Speed Clip ensures order and a clear view of your stock. It can be used on all types of film.

When the clip is removed, the film remains totally undamaged, but the Speed Clip does much more. Here are a few examples.

Handy finger grip

Flexible and self-closing

Rounded ends

Automatic spacing

Leaves no impression on the film

Suitable for window film

Can be used on thick rolls

Ideal for laminates

Space for logo or company name

Tip:

After intensive use Speed Clips may develop some "play". No problem. Just place the Speed Clip in some hot water, and after a short time it will return to its original shape.

PROMOTIONAL TOOLS

PROMOTIONAL MATERIALS

to convince your customer

Today's customers often know exactly what they want. But how do you convince your customer that you can offer them the best? That you have exactly what they need? Our support materials will help you do just that. For each specific subject we have something that can help you with your sales or presentation.

750-WFDB

220v device
European power cord

The DEMO BOX is made of high-gloss acrylic. The glass panels can easily be changed by taking off the lid. The lamp is operated with a switch, which switches off automatically after 2 minutes.

Window film DEMO BOX -with 250V IR lamp

- seeing and feeling = believing! Let the customer experience the result himself
- turnable box with four glass panels

The Window film DEMO BOX is intended to convince your customer that window film really works. The box consists of a base with a turnable unit on top with four glass panels that can be tinted with window film as desired. Press the button and the 250 watt IR lamp turns on. The different types of window film on the glass panels allow your customer to clearly feel the difference in heat protection. Our advice: leave one glass panel free of window film, so that the difference with and without film can be experienced very clearly.

Window film PERFORMANCE BOX – metal case

- seeing is believing!
- convince your customer within 1 minute

The WINDOWFILM PERFORMANCE BOX immediately shows the heat difference between two window films and the temperature difference in both compartments.

The ultra-strong metal case contains two compartments with a 150W infrared lamp inside. Each compartment contains a sensitive temperature gauge and fan at the bottom. Between the lamp and the temperature gauge a glass plate with window film is placed*.

Press the button and the lamps turn on. The temperature rises in both compartments, which can be read on the lower digital displays. The upper digital displays indicate the temperature difference between the ambient temperature with- and without the placed glass plate with window film. After 1 minute the unit switches itself off.

Fans that cool the compartment after each measurement.

Digital displays for clear information. Temperature gauges in Celsius

Operates on 220V. European plug. CE certified.

Full metal housing, painted and neatly finished.

750-WFUV

UV SENTRY TRANSMISSION METER -digital

- convince your customer with this meter
- handy; operates on 9v battery (included)
- measures UV-A

The UV SENTRY is probably the simplest meter available to measure the amount of UV in the spectrum from 325nm to 385nm that passes through a transparent material. The meter measures transmission accurately to 0.1%.

The digital display is constantly updated with real-time measurements.

Make an impact and convince your customer by illustrating the UV blocking properties of your product.

The meter can calculate the actual UV Transmission percentage of a given material. The UV SENTRY can be used to measure the UV characteristics of glass, film, coatings, laminates, or other materials. Use this meter to make convincing sales presentations. The UV SENTRY can effectively promote your UV-blocking products.

Batteries included.

GOOD TO KNOW:

The meter works best with adequate UV light. During a cloudy day, the meter may not be able to detect the sun's rays sufficiently.

750-WFUV price per piece

750-WFUM

WINDOW FILM TESTER -multifunctional

- measures the transmittance of window film in % of UV light, Visible light (VL) and Infrared (IR)

Compact digital readout transmission meter. This handy device globally measures the transmission of the most common properties of window films. Accuracy +/- 2%.

Simply place your window film in the slot at the front of the device. Press the button and in one overview you will see the transmission data in percentages. Batteries included.

Batteries included.

NOTE:

This device provides a rough estimate of the properties of the film. The spectrum of UV, VL, and IR is much higher and this meter cannot measure that entire spectrum. So, it may be that a specific window film actually performs better than the meter indicates. In that case, always check the technical data sheets of the window film in question. Or give us a call for further clarification.

Range/properties:

- (VL) Visible light: up to 530nm
- (UV) Ultraviolet light: up to 365nm
- (IR) Infrared light: up to 950nm

150-047 price per piece

750-WFL

LIGHT METER -in lux

- measuring range: 0.01 - 50,000 lux
- comes in storage bag

This digital light meter is a very precise measuring instrument with which the light intensity in a certain environment can be measured. After the measurement, you know exactly what to do when, for example, window films are applied to exterior windows and the incoming light is reduced.

This can be hugely important, because rooms used by people must comply with a certain amount of light (indicated in lux), to perform optimally or live healthily.

For example, the light in a waiting room should average 250 lux. For offices and laboratories 500 lux. For workshops, 750 lux. And for technical drawing, precision work and color assessment 7000 lux. The measurement is made via a photo element and is then displayed on the screen.

Batteries included.

750-WFL price per piece

750-WFPRO

Batteries included.
220v adapter included.

MEASURING KIT for glass IDENTIFICATION

- 3 devices in one case
- no more guessing and doubting

What kind of glass should you quote with?

Is it single glass? Double? Triple? Is there a Low-E coating perhaps? How large is the distance between the multiple panes of glass? All important if you want to avoid problems like thermal breakage or wrong film choice.

As of now, you have a solution.

This professional kit contains all the gauges you need to know what type of glass you are dealing with. Often, your customer himself does not know what kind of glass he has in his building. Now you can check yourself and make your decision. Indispensable for every professional window film installer.

This is what you get:

Toughened glass indicator

Several types of window film can often be mounted on tempered glass. But then you need to know if that is really the case. This indicator shows you exactly that. Vertical lines appear in the window when you are dealing with tempered glass. 2 lines when it is single glass tempered and 4 lines when you are dealing with double glass tempered.

Low-E coating detector

Some types of glass have an invisible insulating and energy efficient factory coating. But which side is it on? Inside, outside or in between? This meter detects the coating and indicates where it is.

Glass thickness and glass distance meter

This gauge shows exactly how thick the glass is, even when it is made up of several sheets of glass. It also measures the air gap between the glass panes. The following glazing's can be identified by this meter:

- Single glazed
- Double glazed
- Coated double-glazed (Low-E etc.)
- Triple glazed
- Laminated safety glass
- Laminated fireproof glass (also multiple layers)

750-WFPRO

750-WFC

Batteries included.
220v adapter included.

DEMONSTRATION & SALES KIT -window film for buildings

- everything at hand to convince any customer
- extra space and cutouts to add your own sales materials

This professional case is the solution to convince your customer. All-important presentation and measuring tools are in this case. The case consists of a body of soft foam with cutouts where the various items are placed. There are also empty recesses where you can add your own items as desired. Comes with a shoulder strap.

What items are included?

INFRARED LAMP 150 W

IR lamp, including 5m cable, switch and plug. The lamp is safely contained in a metal cage and mounted on a plastic plate with rubber feet.

BATTERY POWERED UV LAMP

Handy UV lamp that emits ultraviolet light from 365 to 370 nm. Operates on 4 AA batteries.

GLASS PANES 15 x 15 cm

Special glass panes are already included such as double glass and Low-E coated glass, plus a standard single glass.

In addition, you have 7 cutouts left, where you can add your own glass panes (with your favorite window films installed).

TEMPERED GLASS INDICATOR

Toughened glass can be covered with several types of window films. But then you need to know if that is really the case. This indicator shows you exactly that. Vertical lines appear in the window when you are dealing with tempered glass. 2 lines when it is tempered single glazing and 4 lines when you are dealing with tempered double glazing.

LIGHT METER -in lux

This digital light meter is a very precise measuring instrument that can be used to measure the light intensity in each environment. After the measurement, you will know exactly what to do when, for example, window films are applied to exterior windows and the incoming light is reduced. This can be hugely important, as rooms where people are, must comply with a certain amount of light (indicated in lux), to perform optimally or live healthily. The measurement is taken via a photo element and is then displayed on the screen. Range: 0.01 - 50,000 lux. Incl. battery.

SUN TRANSMISSION & POWER METER

This meter can do two measurements for you. Firstly, it shows you in percentages how much of the sun rays are blocked. Secondly, the meter shows the amount of energy (power) coming in through your glass panes and window films. This energy is expressed in BTU but can easily be converted to Watts. Battery included.

UV SENTRY TRANSMISSION METER

The UV SENTRY is probably the simplest meter available to measure the amount of UV-A in the spectrum from 325 nm to 385 nm that passes through a transparent material.

Make an impact and convince your customer by illustrating the UV blocking properties of your product. The meter can calculate the actual UV Transmission percentage of a given material. The UV SENTRY can be used to measure the UV characteristics of glass, film, coatings, laminates, or other materials. The UV SENTRY can effectively promote your UV-blocking products.

CAR SHAPES -black plastic

UNIQUE MARKETING PRODUCT: Modern plastic car molds for your showroom. Wrap them in any color you want.

Size: 13cm(5") x 30cm(12")

Showcase your vinyls in the perfect way

How can you demo your color selection in a beautiful and perfect way? Display swatches of vinyl? Only use a color chart?

We've got it for you: SOTT CARSHAPES

These black, plastic car shapes are hollow, lightweight and designed specifically for vinyl wrapping so their colors are shown in the best way possible. Your customer will get a better impression of how the vinyl looks on a curved shape instead of a small swatch out of a color collection.

MODERN SPORTY FORM

We are no longer living in the stone age. Since car wrapping is a modern trend the car shapes should be too! Therefore we have an unbranded sports car shape designed with edges and corners that will give the vinyl that extra radiance. It's as if a real car has been wrapped.

WRAP IT IN YOUR COLORS

The car shapes are made of black plastic and can be wrapped in any color you desire.

Create your own fleet of cars showcasing your most popular colors. SOTT CARSHAPES come in a package of 10.

BEAUTIFUL LARGE SIZE

If you do something it should be done well. That is why SOTT CARSHAPES are a good size. The effects of available colors, including metallic, matte and pearlescent must show up well. And that won't happen with a small mold, so we provide you with a sizable model. SOTT CARSHAPES come in a 13cm(5") x 30cm(12") size.

COVER STYL'
SMART INTERIOR DESIGN

COVER PRIMER+

- clear solvent based primer for interior films
- available in 250 ml and 1 liter

Adhesion primer from Cover Styl', for the application of interior films in edges and corners where adhesion must be guaranteed and optimal. Adheres to smooth and slightly structured non-porous surfaces. Think of furniture panels, glass, painted wood, doors, hard plastic, car paint, etc.

This transparent solvent-based lacquer lays down a permanent thin layer over the desired surface. An application brush is on the inside of the lid. Ensure adequate ventilation during use.

- Drying time: 15-20min.
- Capacity 250 ml: 7.5 - 10m².
- Capacity 1 liter: 30 - 40 m².

SOTT

Bonding primer for water based car lacquers

ADHESIVE ACTIVATOR -100ml

- neutralises surfaces containing silicone
- harmless to the substrate

Always a pain: film that releases out of recesses and channels. This could be for a number of reasons, but one of the main causes is the actual car paint.

Water based car paint: the main cause of poor film adhesion.

Modern car paints can contain silicon molecules. This is obviously going to cause reduced surface adhesion. This is not normally a problem on flat body-work panels as neither the film nor the adhesive layer are under much tension.

However, this tension is present in the recesses, channels and awkward corners with plastic bumpers for example. Optimal adhesion in these areas is of paramount importance. We all know what will happen to the film if the adhesion is not 100%.

Adhesive Activator AA-1400 appears to be the only product that successfully solves the problem of the poor adhesion of film to certain car paints. This industrial grade product is also used as a bonding agent for silicone sealants on a variety of substrates, the sealing of exposed security film edges on glass being a prime example. Available in cans of 100ml.

The risks involved with water-based car lacquers:

Due to the silicone content in modern car lacquers the adhesion of film can be far from optimal. Film under tension (especially in recesses) is bound to come loose and ultimately be returned for repair or renewal.

Application:

- 1) Thoroughly clean and degrease the application surface.
- 2) Using a cloth, apply a small amount of **600-AA-1400** to the substrate and wait for approx. 15-30 minutes (depending on humidity levels).
- 3) Then apply the film dry to the primer and voilà, a much improved adhesion to the substrate. 4) Finish by following the manufacturer's instructions.

Right-Off Adhesive Remover *Goes Green!*

For more than 20 years Sott's Right-Off has been the ultimate adhesive remover in Europe. Can we top that? Yes, we can!

Which is why we are introducing Right-Off 2.0, a new version that removes adhesive, glue and grease even more efficiently than version 1. It's easier and faster than before. It even removes the newest types of adhesives used by vinyl manufacturers. And - maybe most importantly - it is completely environment-friendly!

Simply spray it on, let it do its magic, and scrape the goo from the undamaged surface.

Right-Off 2.0 removes more types of adhesive than the old version. Even specially prime-coated adhesive systems are no match for Right-Off 2.0.

SOTT

The one and only real adhesive remover is renewed!

RIGHT-OFF -adhesive remover

- removes adhesive residue in 2 minutes
- also removes tar, grease, chewing gum, paint, etc.
- harmless to all substrates

Right-Off will not only remove adhesive residue from self adhesive film and window film in less than 120 seconds, but also tar, grease, lubricants, chewing gum, etc. from carpets, upholstery and from plastic, Perspex, Beauty Board, rigid foam, metal, bisonyl, banners and painted surfaces. pH neutral, harmless to substrates and is not classed as a hazardous substance. Suitable for use on all types of film.

Instruction for use:

- 1) Apply Right-Off to the surface and wait for 60-90 seconds.
- 2) Using a Lil' Gripper scraper (300-006) scrape the resulting residue into one place.
- 3) Collect the residue using polishing paper (300-040). Repeat the procedure until all adhesive residue has been removed. Apply additional Right-Off as required
- 4) Thoroughly clean and degrease the treated surface with Surface Cleaner-II (600-SC02) before drying with a clean cloth.

FILM REMOVER

- removes self-adhesive pvc films from automotive paints, wood, expanded-foam boards, decor panels, glass and metal.

600-TRL1000 is a thick, gel-like liquid that is applied with a brush to self-adhesive films that are to be removed. Wait a few minutes and the film will begin to separate itself from the surface. Repeat if necessary. Works on cast, polymer and monomeric films.

Not suitable for multi-layered films such as retro-reflective films and laminated films. Do not use on soft fragile substrates such as plastic, rigid foam, banners, tarps, acrylics, acrylic paint, etc.

Read the instructions on the package carefully. First, test on a small area to see if the product meets your needs.

600-T800

SOTT

INDUSTRIAL DEGREASER/SILICONE CLEANER

- harmless for car paints
- removes silicone, grease, tar, oil, adhesive, paraffin and car importer's wax

A unique balanced product that was especially commissioned and developed some 20 years ago for use in the metal fabrication, automotive and advertising industries. Used extensively in the metal fabrication industry for degreasing prior to chroming or galvanizing. SO THIS IS A REAL DEGREASER!

T-800 Removes underbody coating, car importer's wax, paraffin, grease, silicone, etc. from all surfaces. It will even degrease through water. So having to dry a car before degreasing following a shower of rain is a thing of the past. Just apply with a cloth, wait a few minutes, and then just wipe over with a dry cotton cloth.

T-800 needs to be removed with a cloth because it is somewhat slower than the volatile thinners.

There's a good reason for this; for it to make grease molecules 'float' it has to first get under the molecules. So when the surface is wiped with a dry cloth, the end result is a perfectly degreased surface.

T-800 gets under the grease molecules allowing them to 'float' and be removed by a dry cloth during the final wiping.

Optimal
removal of
SILICONE, OIL,
GREASE, etc.

WE RECOMMEND:

For installing PPF films, we recommend a 2-stage cleaning system. Step 1 is **SOTT SurfaceCleaner 600-SC02**. Step 2 is **Industrial Degreaser 600-T800**.

Suitable for car paints, metal, aluminium, Beauty Board, etc. Not suitable for use on rigid foam, polystyrene, etc.

600-T800FLES 1ltr bottle price per liter

600-T800CAN 5ltr Jerrycan price per liter

600-T900

SILICON / WAX REMOVER

- the best solution for removing stubborn wax

Durable surfaces such as car paint are often treated with a protective layer. The most conventional way to do this is to use a silicone-based wax. Since silicone has a repellent effect, this is ideal to prevent dirt. However, self-adhesive materials such as stickers, strips and wrap films will also no longer be able to adhere. To be able to do this, the wax must be removed. SOTT 600-T900 Industrial Silicon & Wax Remover ensures that the wax becomes soft and dissolves, so that it can then be removed with a soft cloth.

How to use:

1. Wash the vehicle or substrate thoroughly so that all the (street) dirt is gone.
2. Make sure the surface to be treated is dry.
3. Apply SOTT 600-T900 Silicone & Wax Remover with the SOTT 300-040 3-layer cleaning paper. This is how you do it: make a wad of paper in your hand and pour SOTT 600-T900 Silicone & Wax Remover on the cleaning paper.
4. Now polish the treatment surface thoroughly and with circular overlapping movements with your cloth. Do this thoroughly and let it soak in for a few minutes.
5. It is possible that the surface will show a white haze. This is normal. This means that the wax becomes soft and begins to dissolve.
6. Now use the SOTT 300-021 UltraClean cloth, also wet it with SOTT 600-T900 Silicone & Wax Remover and polish the surface in circular movements.
7. If the white haze (if visible) disappears during brushing with 600-T900, then the silicone and / or wax has disappeared.
8. Always polish again with a new dry cloth 300-021 or cotton / microfiber cloth.
9. Allow the surface to wash out for 10-20 minutes before you start foil mounting.

SOTT

SPRAY-N-GONE

- removes glue from window films with two fingers in your nose
- does not affect substrates, rubbers, rebates and interior parts
- biodegradable

The 30 second adhesive REMOVER for WINDOW FILM

Removing adhesive from window film is often a difficult job. Aggressive liquids and sharp metal scrapers are regularly used to get the glass completely clean again. From now on, that won't be necessary.

The SOTT Spray-N-Gone window film adhesive remover is the solution for this. It simply and easily dissolves the adhesive within a few minutes. The adhesive softens and can be easily removed. Afterwards, SOTT Spray-N-Gone works as a perfect surface cleaner to leave the substrate completely 100% clean. Does not affect anything. Completely harmless to the environment.

Characteristics:

- removes adhesive from window films within minutes
- removes grease residue, finger-prints, nicotine deposits, dirt, etc.
- cleans glass, car paint and plastic
- no ADR, no hazardous substance
- biodegradable
- no special protective equipment required
- can be applied with cloth, brush, roller or sprayer

Instructions for use:

- 1) Spray the adhesive layer that remains when the window film (tinting film) is removed.
- 2) Let it soak in and use a plastic scraper or squeegee to scrape the adhesive together.
- 3) Use cleaning paper (300-040) to pick up the softened adhesive residue and wipe it off the surface. Repeat the procedure if necessary.
- 4) Then lightly spray the surface again and now clean it thoroughly with the SOTT UltraClean cloth (300-020) to leave a 100% clean and degreased surface.

For large glass areas and windows in buildings

GLASSCLEANER

- for optimal cleaning and degreasing of glass to prepare it for the mounting of tinting film
- with a fresh and pleasant odour; no lingering nasty smells
- deep-cleans and dries fast without leaving stripes.

When large shop windows or windows in or on offices are to be covered with tinting film or vinyl, good bonding is of the utmost importance. No glass is perfectly smooth - the small surface irregularities are going to get dirty. New glass often has paraffin wax on the surface. Our GlassCleaner cleans and degreases glass thoroughly for installation of film.

Suitable for cleaning:

- large glass windows
- glass tables and doors
- acrylic, polycarbonate, etc.
- rigid foam
- objects that are coated with acrylic paint
- tables, doors, desks
- rabbits and frames

GlassCleaner draws the dirt out of the tiniest surface irregularities and lets it 'float', so it can be wiped away with a sponge, cloth or squeegee.

Harmless and with a pleasant odour

GlassCleaner is especially developed for regular use on large surfaces and lacks the typical offensive odour of alcohol- and ammonia-based cleaners. Also it is completely biologically degradable, non-corrosive and non-irritant. Good to know, next time you are spraying your cleaner around in a large office swarming with employees. There is no need to wear protective clothing or gloves.

Multifunctional!

GlassCleaner does more. Its formula makes it perfect as a general multifunctional cleaner for plastic boards, doors, tables tops, desks, shelves, etc

Instructions for use

Easy. Just spray the surface, if needed rub with a Scotchbrite Anti-Scratch scrub pas (300-025), then wipe away with a cloth or squeegee. Done!

Nothing more awkward than customers or staff complaining about the bad smell caused by cleaning the windows in a home or office. No more problems with the penetrating smell of ammonia or alcohol. GlassCleaner just smells fresh and does its job perfectly. And it can be used as interior cleaner!

Windows that reach down to the carpet or other valuable floor covering are popular and good-looking. But if your cleaner bleaches or tarnishes it, there will be trouble. GlassCleaner is your multi-functional cleaner that ONLY does what it SHOULD: it cleans the applied-on surface quickly, simply and without leaving any stripes.

For a more thorough cleaning Scotchbrite Non-Scratch scrub sponge are ideal.

Look under: 'Scrapers & Cleaners' in
3M SCOTCHBRITE NON-SCRATCH SPONGE

600-DO

SOTT

Glass cleaner for car windscreen window film application

DIRT-OFF

- as recommended by window film manufacturers

Window film manufacturers recommend Dirt-Off for cleaning windows before film application. Contains a highly diluted 'acid' for completely removing grease, oil and dirt from glass without damaging its surface.

Slightly acidic
CLEANER for
car windows

Dirt-Off is also ideal for use as a bonding aid to improve adhesion to the dot matrix raster and the rear windscreen demister.

The windows of second hand cars or cars that have been used for transporting a dog should be cleaned with Dirt-Off before applying window film.

The dot matrix raster around the edge of windscreens often present adhesion problems. Dirt-Off cleans these small areas thoroughly, thus ensuring improved adhesion.

600-DO 1ltr bottle price per liter

600-SC02

SOTT

Professional cleaner before film application

SURFACE CLEANER-II

- developed especially for professional installers of all type of films
- cleans car paint, metal, plastic, glass, bisonyl, etc, etc.
- biologically degradable

The fast
CLEANER
for all
surfaces

SOTT Surface Cleaner-II is the number one cleaner in the self-adhesive film industry. It meets all of the demands of the installer; just spray Surface Cleaner-II on any surface. It loosens the dirt and you just remove it with a dry cloth. Surface Cleaner works fast and dries during polishing. No stripes, lines or dirt getting spread around.

Just grab the SOTT Surface Cleaner-II, spray, wipe with a dry cloth, job done!

This universal cleaner certainly lives up to its name: it can clean any surface, removing dirt, grease, adhesive residue, etc ready for film application. This product has been developed in accordance with the latest European standards and legislation, and conforms to all current environmental requirements.

WE RECOMMEND:

For installing PPF films, we recommend a 2-stage cleaning system. Step 1 is **SOTT SurfaceCleaner 600-SC02**. Step 2 is **Industrial Degreaser 600-T800**.

Paint, Plastic and Rubber

SurfaceCleaner-II is specially developed to, thoroughly and quickly, get a perfectly clean and grease-free surface on all types of vehicle substrates – paint, plastic and rubber. No whitening or burning of the clear coat. The mixture of special ingredients removes grease, grime, wax and adhesive residue at the molecular level.

Windows

Before you start installing window film, etch glass or vinyl lettering, you want to make sure the surface is completely clean. You'll be amazed at how effective and fast SurfaceCleaner-II does its job! It "seeps" under grease and dirt molecules that results in an easy wipe off and it evaporates quickly.

Signshop Workhorse

Plastic sheets, advertising signs or banner material? No worries. The multi-talent product called SurfaceCleaner-II is designed to be suitable for all types of applications.

Cleaner for (matt) car wrap film

CARWRAP FILM CLEANER

- the Number One cleaner for matt and gloss films

Car wrapping is really HOT at the moment, especially the matt colours. However, it won't have escaped the notice of car wrappers how much more difficult coloured matt films are to clean than coloured gloss. Why is this?

CLEANER for MATT and GLOSS car wrap film

It's the dimples in the film

Matt films are somewhat structured with minute 'dimples' that deflect light to give it the matt appearance. These dimples collect street grime that is difficult to remove with ordinary cleaners.

Road salt, exhaust vapour and brake dust

Normal street grime is nowhere near as stubborn as the road salt used during the winter, especially when it's combined with asphalt and rubber. Add to that the steam from hot engines and the underside of cars that spreads to the sills and spoilers.

Not to mention the dust from disc brakes that escapes through the wheels and clings to side of the car. This is a common problem especially with sports and executive models. These models are much closer to the road and the dirt; they tend to be driven faster, so the brake shoes are subjected to more wear, etc.

What does Carwrap Cleaner actually do?

Carwrap Cleaner loosens the dirt between the dimples and 'suspends' it until it's removed from the surface.

The supplied car wrap sponges absorb the dirt preventing it from returning to the dimples. Then just rinse with clean water - job done!

Fashionable light colours such as matt white, matt silver or matt grey are notoriously difficult to clean. A winter of road salt, a rainy day, or simply brake dust or exhaust vapour all present problems.

The car wash, steam cleaners or ordinary cleaners only remove surface dirt, and they always leave a dark haze on the film.

This Opel Astra speaks volumes. After not being washed for 3 months, this car was cleaned using the conventional method. Only the surface dirt was removed. At first sight, it looks fine. Only when the left hand side has been cleaned with Car Wrap Cleaner is the difference suddenly apparent.

This Astra speaks volumes. After not being washed for 3 months, this car was cleaned using the conventional method. Only the surface dirt was removed. At first sight, it looks fine.

Don't!:

Never use thinners, degreasers or surface cleaners for removing dirt. This will increase the problem much more.

Just do!:

A great seller to add to your range! Your car wrap clients can maintain that perfect look themselves if they purchase a Car Wrap Cleaner set.

The special sponges can be ordered separately.

Protective layer for window film

WINDOWFILM-POLISH

- gives the film a protective sheen
- offers an extra protective layer between the film and the window reveals.
- for interior use only

After the application of window film, the top layer often displays stripes and matt areas. These are just harmless traces of lime from the application fluid or simply small areas of dirt left by the squeegee. After a while, the film on wind-up windows may start to get scratched or scuffed by the dirt in the seals and felt in the window rebates. This can be fixed.

Film-Polish brings back the shine and leaves the film sparkling, as well as giving it a dirt-repellent protective layer.

Window film in cars

Ideal for use on the window film on wind-up windows, as the smooth protective layer allows the film to run more smoothly between the seals and the felt in the window rebates. This will prevent scratches.

Window film in buildings

Film-Polish gives large windows an impressive sheen as well as a dirt repellent layer. Not only that, after the film has been polished it has an incredibly 'clean and tidy' appearance - great for customer satisfaction!

Large windows look exceptionally clean after being polished with Film-Polish and it makes them dirt-repellent.

Wind-up windows are subjected to abrasion by the felt, etc., during use. This abrasion can be reduced by applying Film-Polish to the film immediately after application.

Tip:

*A great seller to add to your range!
Your customer can maintain that perfect look of the tinted glass themselves if they purchase a bottle of*
600-GP346 Windowfilm Polish.

5L

SOLAR VARNISH -heat protection coating 5L

- blocks up to 85% of the sun's heat (IR)
- 5 ltr can

Solar Varnish is an alkyd resin-based translucent white heat resistant coating that can be simply applied to glass, polycarbonate and acrylic. This coating blocks as much as 85% of the sun's heat. Ideal for skylights in factory buildings etc. Solar Varnish contains reflective particles that reflect both UV and infrared light. In addition, the absorption is low, so there will be little radiant heat. The coating is translucent matte, so it is not transparent. The result after application is a milky white, translucent layer. The best installation temperature (environment) is 10-15 degrees. Do not apply during rainy, foggy or wet weather. Lifetime 8 years (horizontal: 3-4 years).

Technical information:

- Visible light transmission: 25%.
- Solar energy protection: up to 85%
- UV protection: 90%
- Glare reduction: 80%
- Absorption: 10%
- Consumption/capacity: 30m2 (2 layers)

Instructions for use:

1. Substrate must be degreased and clean.
2. Can be applied by spray (for best result), brush or roller. Apply 2 layers.
3. Dilute the first layer with 50% white spirit.
4. After 2 hours, the second layer (undiluted) can be applied.

More information is enclosed in the package.

SOTT

Positioning concentrate for window film

FILM-ON -slip agent for window film and ppf

- improved moisture distribution
- no more white haze or spots after application
- easier positioning and squeegeeing
- also useable as slip agent for ppf film

Window film
and PPF
application
made EASIER
than ever

Film-On is the window tinter's friend and ppf's installers companion. It has unique properties not found in any other slip agents. It still has the edge on all other products on the market.

A colourless jelly-like concentrate for dilution in water. Just add a little to water, give it a quick shake and it's ready to use. Film-On evaporates faster, and has a glutinous

property that increases the viscosity of the solution. When it's sprayed on to glass, it stands firm unlike the soap and water solution that just cascades back down the glass.

You will notice immediately how much easier it is to slide the film. The solution between the glass and the film is softer and thicker which makes squeegeeing a lot easier.

White stripes and moisture build-up between the film and the glass during drying is also reduced (common with safety film) -a big plus! Adhesion is vastly improved.

A white haze or a collection of miniscule air bubbles is caused either by poor execution or by the reaction between the moisture and the adhesive layer of the film. FILM-ON almost eliminates the chance of white haze.

RIGHT-ON! SPRAY -Application liquid

- faster than soap and water
- easy to use
- 3 minutes to position and make adjustments before adhesion starts

The one and only 3 minute APPLICATION LIQUID

The perfect solution for fast and effortless application of self adhesive films without air bubbles and wrinkling. Right-On allows the film to be repositioned after initial application.

It offers all the advantages of soap and water, but it works faster. Spray the substrate and adhesive layer of the film, apply the film and slide it effortlessly in to position. The film begins to bond after just 3 minutes and you can even start working it into channels immediately.

Right-On Spray will not affect the adhesive layer.

Suitable for use on all types of wet application film.

Hot garage? Sticky film? No Problem

On warm days, even the friendliest wrap film can get aggressive which can cause install times to shoot up as well as frustration levels. Using a thin mist of Right-On Spray on both the surface and adhesive can help that panel slide and glide. The unique blend of Right-On Spray won't compromise the adhesive so it's safe for all brands.

Quick and easy installing of PPF films

Right-On Spray is suitable and effective solution for PPF. It gives the installer the freedom to position and readjust which allows them to install with confidence. And because of the special ingredients in Right-On Spray, the final adhesion level is even improved when compared to other liquid carriers.

Oversaturated or Aggressive Full Print Wraps?

Printed film sometimes feels different, has harder tack and can be tough to install (especially when the panels are big). This is often caused by films that haven't properly outgassed or are oversaturated. Heat and humidity can also cause full print wraps to grip overly hard. Right-On Spray was made for just these situations. Simply spray, position, squeegee and you're done!

This product has been developed in accordance with the latest European standards and legislation, and conforms to all current environmental requirements.

150-CS10

10cm width

MP SQUEEGEE -multipurpose

- one corner is straight, the rest is rounded
- including alcantara strip with sponge

The MP Multipurpose squeegee from CoverStyl' is a must-have for any installer. This squeegee won't damage interior films while squeegeeing and also gives the right amount of pressure. One corner of the squeegee is straight and allows you to push film into corners. The other side has felt, which is ideal when installing high gloss films. Wet the felt with water before squeegeeing and you won't get scratches in the film.

can be found in the catalog under
the category:
SMART TOOLS*

100-NP-2 price per piece

150-201

SOTT

SOTT® ROLLER -heavy duty

- 150mm (6") wide
- top-heavy version; with bearings

Professional roller mounted in ball bearings and intended for intensive use. Top heavy means that the actual rubber roller is the heaviest part of the tool allowing extra pressure to be exerted during application procedures. Covering large surfaces (such as a table) on your own with for example an interior film with a very strong adhesive can be a challenge. With a roller, it is very easy and hassle-free. The roller gradually presses the film onto the surface without tension or stretch, while a squeegee pushes the film away slightly. On large surfaces, this can then cause a little film tension. Not with the SOTT ROLLER!

*More detailed information
can be found in the catalog under
the category:
INSTALLATION TOOLS*

150-201 price per piece

300-023

LOWTACK TACK RAGS -on a roll

- removes all dust from any surface before applying interior film
- leaves no residue

Slightly adhesive wipe on a roll. Ideal for removing all dust from any surfaces to be worked on. Removes dust and dirt from surfaces before applying interior film. The roll is 30cm wide and each roll has 62 sheets that can be pulled off as required. One side is slightly adhesive. Leaves no residue.

Roll length: 36m (62 sheets)

300-023 price per roll

400-008

CHINA MARKER -for films

White marker to make markings and size lines to know where to cut. So ideal for interior films when you need to cut a piece of film to size. Easily wipe your mark away with water and a cloth or SOTT Surface Cleaner-II (600-SC02).

400-HLSCAN

STEINEL® Infrared Temperature scanner

- insurance cover for temperature-sensitive workpieces.

Temperature scanner HL Scan monitors workpiece temperature by a beam of LED light. An acoustic and visual signal warns the user when temperature exceeds or falls below the permissible limit. For the 400-HL 2020E and 400-HG 2120E.

400-HLSCAN price per piece

400-IR02

SOTT® Infrared Meter

- post-heating on the right temperature

The SOTT Infrared Meter measures it for you. Fast and simple. You simply aim the laser at the object you are heating up, and the gauge will immediately indicate the current temperature. Added to that you can keep the last temperature reading by releasing the front button.

An ideal and indispensable tool for any signmaker, car wrapper or interior film installer who needs to know whether the right temperature of the film has been reached. Includes a 9 volt battery.

COVER STYL'
SMART INTERIOR DESIGN

COVER PRIMER+

- clear solvent based primer for interior films
- available in 250 ml and 1 liter

Adhesion primer from Cover Styl', for the application of interior films in edges and corners where adhesion must be guaranteed and optimal. Adheres to smooth and slightly structured non-porous surfaces. Think of furniture panels, glass, painted wood, doors, hard plastic, car paint, etc.

This transparent solvent-based lacquer lays down a permanent thin layer over the desired surface. An application brush is on the inside of the lid. Ensure adequate ventilation during use.

- Drying time: 15-20min.
- Capacity 250 ml: 7.5 - 10m2.
- Capacity 1 liter: 30 - 40m2.

COVER STYL'
SMART INTERIOR DESIGN

COVER PRIMER

- 1 liter
- water base

Water-based adhesion primer from Cover Styl', for applying interior films and other films to porous and difficult to adhere substrates such as untreated wood, sheet metal and walls. Not intended for smooth surfaces such as furniture panels, glass, smooth painted doors, etc.

This thin milky liquid deposit a permanent thin layer over the desired substrate. To be applied by brush or roller. Simply apply, wait 40-45 minutes minimum. Sand away any hard and rough spots with sandpaper. Then apply film. Adheres to all types of substrates except non-polar and rubber surfaces.

- Drying time: 40-45 min. minimum
- Capacity: 30 - 40m2.

YOU ARE UNIQUE

So is the service you deserve from us!

A sales relation with us

- ✓ Dedicated contact person
- ✓ In your language
- ✓ Going the extra mile
- ✓ Flexible for your business needs
- ✓ Human, dynamic & fun
- ✓ Since '84

YOUR NEEDS, SIMPLY DELIVERED

Our daily commitment!

At Solar Screen you can count on

- ✓ Wide range of products
- ✓ In stock
- ✓ At a competitive price
- ✓ Without MOQ
- ✓ Shipped on the day of order
- ✓ Controlled CO2 footprint

YOUR GROWTH, OUR DRIVE

Long-term, the only way we see our relation!

Multiple solutions

- ✓ Building product awareness
- ✓ Strong technical expertise
- ✓ In-house trainings
- ✓ Customized marketing for your brand
- ✓ New products through R&D
- ✓ Investing for you
